

SS PVD Coating Interior Wall Partition

Premium Stainless Steel Interior Partition for Modern Residential & Commercial Spaces

Product Overview

Experience the preeminent choice in modern interior design with our **SS PVD Coating Interior Wall Partition**, available at competitive prices from leading manufacturers, suppliers, and traders in India. Designed with contemporary geometric patterns featuring oval and linear elements, this partition adds a sophisticated architectural touch to any interior.

Manufactured using high-quality, rust-resistant **SS 304/316 stainless steel** and finished with a luxurious matte or glossy **PVD (Physical Vapor Deposition) coating**, the partition offers excellent corrosion resistance, high tensile strength, easy maintenance, and superior durability. Its fingerprint-resistant and non-combustible construction makes it an ideal solution for modern residential, hospitality, retail, and commercial interiors.

Key Features & Benefits

Material	Premium Stainless Steel 304/316
Surface Finish	PVD Coating – Matte or Glossy
Design	Customizable geometric, oval, and linear patterns
Installation	Floor-to-ceiling installation with concealed fixings
Durability	High tensile strength and long service life
Resistance	Excellent corrosion, rust, and fingerprint resistance
Maintenance	Easy to clean and maintain
Safety	Non-combustible construction
Customization	Custom size, color, pattern, and finish options

Versatile Applications & Competitive Advantages

Designed for floor-to-ceiling installation, the SS PVD Coating Interior Wall Partition is an excellent choice for homes, offices, hotels, showrooms, restaurants, retail outlets, and other commercial environments. It functions as both a decorative architectural feature and a practical room divider, helping create distinct spaces while maintaining an open and elegant visual appeal.

Its customizable dimensions, colors, patterns, and surface finishes provide flexibility for a wide range of interior concepts. The combination of premium stainless steel and PVD coating delivers a modern appearance with excellent durability and resistance to everyday wear, making it a reliable alternative to traditional interior dividers.

Certifications & Sampling Process

Relevant quality certifications can be provided upon request, subject to product and project requirements. Sample panels are also available for customers who wish to review the material, coating, color, pattern, and finish before proceeding with a full-scale order.

Our team supports a smooth sampling and order process, with secure packaging, timely handover, and regular updates regarding sample dispatch and expected delivery. This allows customers to verify the product quality and finish before final installation.

Frequently Asked Questions (FAQs)

Q: How is the SS PVD Coating Interior Wall Partition installed?

A: The partition is generally installed from floor to ceiling using concealed fixing systems, providing a clean, seamless appearance and sturdy support. It can be customized to suit standard ceiling heights and project-specific requirements.

Q: What makes the SS PVD coating highly resistant to corrosion?

A: The PVD coating is applied over a stainless steel 304/316 base, creating a durable decorative surface with excellent resistance to corrosion, rust, and everyday environmental exposure in indoor applications.

Q: When can I expect delivery of a sample panel?

A: Sample panels are generally supplied within the agreed lead time after the sample request is confirmed. The exact delivery schedule depends on the selected design, finish, customization, and order requirements.

Q: Where can these partitions be used?

A: These partitions are suitable for residential homes, offices, hotels, showrooms, retail spaces, restaurants, commercial interiors, and other modern architectural environments.

Q: What are the main benefits compared with traditional dividers?

A: The partition offers high durability, easy maintenance, excellent corrosion resistance, a premium modern appearance, customizable designs, and a non-combustible stainless steel construction.

Q: Is customization available for size, color, pattern, and finish?

A: Yes. The partition can be customized in terms of dimensions, color, geometric pattern, surface finish, and other design requirements to suit the specific interior project.

Note: Product specifications, dimensions, finishes, and customization options may vary according to project requirements. Please confirm final technical details before placing an order.
