ABOUT US

WELCOME TO
Progressive
ROTO PLAST

Progressive Roto Plast was established in 2005. As a leading manufacturer of Rotational Molding compounding material and other customized product during last one decade.

Progressive Roto Plast specializes in offering a very specific range of polymer compounds which is exclusively used as a raw material in rotational moulding water storage tank, road barrier, dustbin & other articles with a team of highly professional workers.

With an enormous skill and technical know-how in the field of rotational molding inherited by years of experience from our group of companies Perfect Polymers, Paradise Polymer. we have the perfect knowledge and with the state of art technology lab size roto molding machine & a big roto molding machine fitted with internal temperature measurement system and other advance controls. We do material trial first at our plant so we can provide ready recipe of molding and other specification to costumers, saving lots of time & money.

Because of our consistency of quality and best service, we reaching over number of costumers with passion of ethically sourcing the finest **Rotomolding Powder** we made great connection with each of our customer and we make sure everting we do honours that connection from the commitment to the quality product and that's why we do business of **5000 tonnes** annually in our market of which we proud to leadership position we have earn for our company.

After this marvellous success in market to fullfill the demand of rotomolding powder globally we have setup an ISO 9001:2015 Certified efficient manufacturing plant in **UAE** 🇦🇪 with the target of **10,000 tonnes** annually because we think the world looking at us to set the new standards, yet again we will lead....!

Special Colour Powder

PULVERIZING

Progressive Roto Plast gives perfect size of powder which facilitates their fast & easy movement in the processor moulding, Perfect particle shape & size of our powder offers material & weight savings for the moulded part & reduce processing time & low fuel cost.

Because of very fine particle size make distribution over the mold uniformly decrease air gaps between them, uniform wall thickness of products, so its increasing mechanical properties. Regular Bulk Density tests are carried out during Pulverising Operation.

We Gives Colours to your Ideas ...

Special Easy Foam Compounds

- Easy foam compounds : EF-01, EF-02, EF-03
- Easy to use - same moulds, machine, process
- Uniform cell structure - More impact strength and insulation
- 0% rejection
- Various thickness and expansion possible
- 100% recyclable
- Food grade foam material also available
- Total technology support -
 - 24 hr Technical support for trouble shooting
 - Shop floor training for operator and supervisors

Advantage of foam in rotomolded products :

- Insulation : Excellent insulation properties
- Light Weight : Higher stiffness at lower cost
- Composite Layers : Strong Bonding between layers
- Easy Process : Use existing equipment

|----------------------------|---|---|
| • Appearance | : | Yellowish Polymeric Pulverised Powder |
| • Grade | : | Easyfoam EF-1 |
| • Carrier Resin | : | LLDPE |
| • Properties | : | Regular Fine structure better surface |
| Appearance Direct Doses | | |
| • Recommended Dosage | : | 50% to 100% of the weight of foam layer |
| • Recommended Process Temp | : | 215 - 230 °C |
| • Packaging | : | 25 Kg |

Special Performance

Mettallocene Hexene Powders High ESCR, High Melt Flow, High Gloss mPE 35 Compound

- Automobile fuel tanks
- Playground equipments
- Custom Molded product

High Density, High Strength, High Stiffness mPE 40 (HDPE Compound)

- Bigger size tanks
- Underground tank
- Custom molded products
- Furniture Products
- Automobiles parts

Clear Transparent Rotomolding PP Grade

- Structural Parts
- Design (Furniture)
- House Appliances such as lamps, etc.

Why ?

Progressive
ROTO PLAST

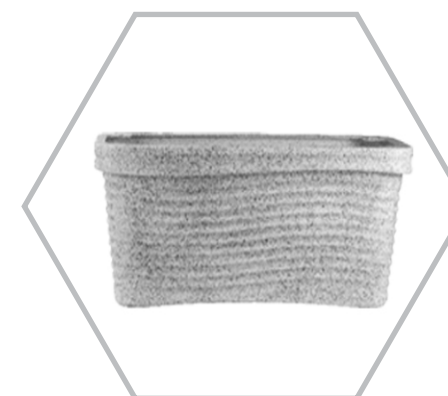

Our Products

- Colour Powder
- Rotofoam Compounds
- HDPE Powder
- Stone Effect Powder
- Pearl Effect Powder

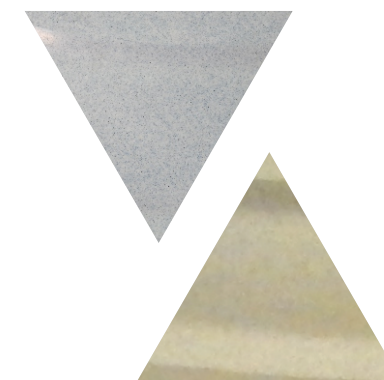

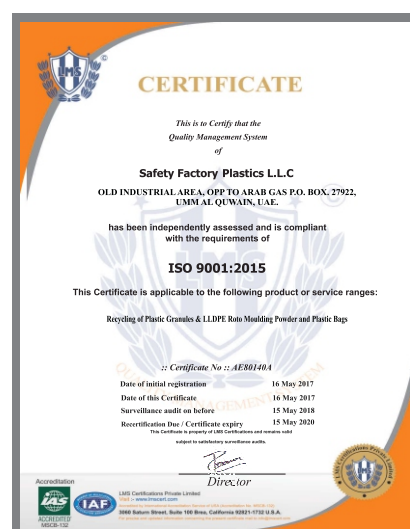

Special
