About Us

Manjulata Engineering Private Limited is dedicated to delivering dependable solutions that support efficient material handling and surface protection across a wide range of industrial applications. As a trader, supplier, and service provider, we focus on meeting the evolving requirements of industries by offering products and solutions that enhance operational reliability, minimize downtime, and improve equipment performance. The product portfolio includes conveyor roller, skirting rubber for conveyor, durashield wear coating, rubber wear panel, and magnetic rubber liners, all selected to address demanding working conditions where durability and performance are essential. Built on a commitment to quality and customer satisfaction, the company emphasizes long-term value through products known for superior wear resistance, enhanced abrasion protection, and impact-resistant performance. Every solution is chosen with the objective of extending service life, reducing maintenance requirements, and supporting uninterrupted operations. Strong resistance to corrosion and wear further ensures dependable functionality even in challenging industrial environments. By combining quality products with responsive service, we strive to help businesses maintain productivity while controlling operational costs.

Manjulata Engineering Private Limited was established in 2023 in Khurda, Odisha, India, with the objective of delivering reliable industrial solutions that enhance equipment performance and operational efficiency. As a trader, supplier, and service provider, the company caters to diverse industrial requirements by offering products that support effective material handling, wear protection, and long-term operational reliability. The product range includes conveyor roller, skirting rubber for conveyor, durashield wear coating, rubber wear panel, and magnetic rubber liners. These solutions are recognized for their durability, superior wear resistance, impact protection, and dependable performance in demanding industrial environments. By focusing on quality and customer satisfaction, the company helps clients reduce maintenance requirements, extend equipment life, and improve overall productivity. Supported by a dedicated team, Manjulata Engineering Private Limited works with a commitment to excellence, timely service, and continuous improvement. Strong technical understanding, ethical business practices, and a customer-centric approach enable the company to provide dependable solutions that meet industry expectations. Through quality products and responsive support, the company continues to build lasting relationships with customers while strengthening its position in the industrial sector.
