About Us

EMC Instruments is dedicated to delivering reliable measurement and testing solutions to assist in accurate monitoring, efficient operations and informed decision-making for a wide range of industrial applications. As a trader, supplier, retailer, and wholesaler, we are working to provide you with instruments that are practical, quality focused, with reliable performance and easy to operate. Measuring, inspecting, testing and process monitoring demands call upon a range of products including the Hart Field Communicator, Ultrasonic Clamp On Flow Meter, Hot Wire Anemometer, Surface Finish Tester and Ultrasonic Testing Machine that are selected to address these different requirements. Each solution is selected for its durability, readability, measurement accuracy, and repeatability to ensure that users can complete their routine and specialized tasks with confidence.

While we take user-friendliness into account, ease of handling is also a primary consideration; this is so that instruments can be used seamlessly in various working environments. The focus on strong design and maintenance also makes the range ideal for frequent professional application where reliability becomes a critical factor. These tools are designed to be flexible and can be used in a variety of industries and for different types of operations, without sacrificing usability. The company is dedicated to offering solutions that meet customer needs and is not just about selling equipment; it is about understanding them and meeting their needs. We have an active staff that helps the business to run with being responsive, understanding the products, and providing customer service. We are doing our best to increase our footprint by means of reliable products, useful support and a strong focus on quality and standards in all interactions with our customers.

Our Products

Low Strain Pile Integrity Testing

LRG200 Concrete Rebar Scanner

Wall Mount Ultrasonic Flow Meter

Cross Hole Sonic Logging Test

Non Nuclear Density Gauge For Asphalt

Bosch D-Tect 200 C Rebar Locator

Ultrasonic Clamp On Flow Meters

PC Based Hart Communicator

Hot Wire Anemometer

Surface Finish Tester

Concrete Crack Depth Meter

Insertion Type Ultrasonic Flow Meter

Emerson 475 Hart Communicator

Rebar Pull Out Testing Machine

Surface Roughness Tester

Adept Magnetic Flow Meter
