

RADHE ENTERPRISE

SAFETY DATA SHEET

Silicone Defoamer

1. Identification

Product Name: Silicone Defoamer

Generic Name: Water-Based Silicone Emulsion – Food Grade & Kosher

Use & Restrictions: Antifoam / Defoamer

Manufacturer: RADHE ENTERPRISE
PLOT NO.30, YOGI ESTATE-2, GIDC,
ANKLESHWAR-393 002, GUJARAT, INDIA.

EMERGENCY CONTACT: +91 9904067684 (Office)

2. Hazard(s) Identification

Hazard Classification: This product does not meet the classification criteria for health or physical hazards as supplied and is considered a non-hazardous chemical.

Signal Word: NA

Hazard Statement(s): NA

Precautionary Statement(s):

Prevention NA

Response NA

Storage NA

Disposal NA

3. Composition/Information on Ingredients

Chemical name	CASRN	Weight %
%Non-hazardous product	-	-

4. First-aid measures

Skin: Wash exposed areas with soap and water. Remove contaminated clothing while washing continuously. Discard contaminated clothing and shoes.

Eyes: Flush eyes with gently flowing water for a minimum of fifteen minutes. Check for and remove contact lenses. Hold eyelids apart to ensure rinsing of the entire surface of the eye and lids with water. If irritation develops, seek medical attention immediately.

Ingestion: If swallowed, dilute with two glasses of water. Seek medical attention immediately. INDUCE VOMITING ONLY UPON ADVICE OF A PHYSICIAN. Never give anything by mouth if victim is unconscious or having convulsions.

Inhalation: Move victim to fresh air. Assist in breathing, if necessary, and seek immediate medical attention.

5. Fire-fighting measures

Suitable (and unsuitable) extinguishing media

This product is water based and will not ignite at its boiling point of 212°F. This product will ignite when exposed to an ignition source while at a temperature at or above its flash point. Use carbon dioxide, dry chemical or alcohol-type foam or universal-type foams to extinguish flames. Water spray may be used to cool fire-exposed containers.

Hazards arising from product

This product contains methyl-polysiloxane which can generate formaldehyde at approximately 300°F (150°C) and above in atmospheres that contain oxygen. Other decomposition products from thermal breakdown are aldehydes, ketones, carbon oxides, sulfur oxides, nitrogen oxides and silica.

Protective equipment and precautions for fire-fighters

Wear self-contained breathing apparatus and protective clothing when combating a chemical fire in a confined area.

6. Accidental release measures

Personal precautions, protective equipment, and emergency procedures

Remove spills promptly as they may make floors slippery. Several washes and/or the use of detergents may be necessary to completely clean any spill. Wear recommended protective equipment outlined in Section 8 of this document and provide adequate ventilation during clean-up.

Methods and materials for containment and cleaning up

Spills should be contained, solidified with absorbent, noncombustible material and placed in labeled containers for disposal. Material should be disposed of at a licensed facility. As supplied, this material is not regulated by RCRA or CERCLA.

7. Handling and storage

Precautions for safe handling

Avoid contact with eyes, skin and clothing. Use with adequate ventilation. Wash thoroughly after handling. Ensure that containers are properly secured prior to moving.

Safe Storage Conditions & Incompatibilities

Keep container closed during any storage. Protect from moisture and foreign materials. Keep away from heat, sparks, and open flames. Avoid direct sunlight. Do not re-use this container. Store product away from combustible materials. **Product contains water and will freeze if internal temperature falls below 32°F.** For optimum storage conditions, store between 50°F and 95°F or in properly insulated structures.

8. Exposure controls/personal protection

Component	CASRN	OSHA PEL	ACGIH TLV
No data here	-	-	-

Engineering Controls: General Ventilation is recommended.

Eye protection: Safety glasses with side shields are recommended as a minimum, but chemical goggles or a face shield provide better protection.

Skin protection: Skin contact should be minimized. Wash all affected areas prior to eating and at completion of handling. Contaminated clothing should be removed at completion of handling. Impervious gloves (butyl, neoprene, nitrile), coveralls or apron and boots are recommended.

Respiratory protection: None required under normal conditions of use.

9. Physical and chemical properties

Appearance: White opaque liquid
Odor: Bland odor
Odor threshold: ND
pH: 5.8 – 7.6 (neat)
Melting point/freezing point: 32°F freezing point
Initial boiling point and boiling range: ND
Flash point: >100°C (>212°F) Setaflash Closed Tester ASTM D3278
Evaporation rate: ND
Flammability (solid, gas): Non-Flammable liquid
Upper/lower flammability or explosive limits: ND
Vapor pressure: ND
Vapor density: ND
Relative density: 1.013 g/ml
Solubility(ies): Dispersible in H₂O
Partition coefficient: n-octanol/water: ND
Auto-ignition temperature: ND
Decomposition temperature: ND
Viscosity @25°C: 500 - 1100 cps (Brookfield RVT)
Pour Point: 35°F

10. Stability and reactivity

Reactivity: Non-reactive when used under normal conditions.
Chemical stability: Stable when used under normal conditions.
Possibility of hazardous reactions: Hazardous polymerization will not occur under normal conditions.
Conditions to avoid: None
Incompatible materials: Strong oxidizing materials and alkali based materials.
Hazardous decomposition products: Hazardous decomposition will not occur under normal conditions.

11. Toxicological information

Routes of Exposure & Effects

Skin Acute: No irritation is likely to develop following repeated or prolonged contact with skin.
Chronic: No chronic effects anticipated.

Eyes Acute: Exposure may cause mild transient irritation, redness and/or tearing.
Chronic: No chronic effects anticipated.

Ingestion Acute: May result in nausea/intestinal discomfort such as diarrhea or gastrointestinal irritation.
Chronic: No chronic effects anticipated.

Inhalation Acute: Not considered a hazard under normal use conditions.
Chronic: No chronic effects anticipated.

Carcinogenic, mutagenic and reprotoxic information:

Reproductive Effects: None Known
Mutagens: None Known
Carcinogens(NTP, IARC, OSHA): None Known

12. Ecological information

No data available at date of publish.

13. Disposal considerations

As supplied by ESP, discarded product is not considered a hazardous waste under RCRA, 40 CFR 261. Please dispose of in accordance with all local, state and federal regulations. It is recommended that the waste be incinerated or land filled at a licensed facility. Do not distribute, make available, furnish or reuse empty container except for storage and shipment of original product.

14. Transport information

Department of Transportation: Not Regulated
TDG (Transportation of Dangerous Goods): Not Regulated

15. Regulatory information

U.S. Regulatory Information:

SARA 302 Threshold Planning Quantity: NA
SARA 304 Reportable Quantity: NA
SARA 311/312 Categories: NA
SARA 313 Supplier notification: As supplied by ESP, no chemical in this product exceeds the de minimis reporting level established by SARA Title III, Section 313 and 40 CFR 372.
CERCLA As supplied by ESP, no chemical in this product is subject to the reporting requirements of CERCLA.

16. Other information

HMIS:

Health	1
Flammability	0
Physical Hazard	0
Personal Protection	B

DISCLAIMER:

The information contained herein is given in good faith but makes no representations as to its comprehensiveness or accuracy. This document is intended only as a guide to the appropriate precautionary handling of the material by a properly trained person using this product. Individuals receiving the information must exercise their independent judgment in determining its appropriateness for a particular purpose.
