- Providing the best quality products with strong quality control tests and checks to reduce product failure
- Continual improvement and development of new processes and systems

Sanitization & Disinfectant Tunnel

Built-in Atomized liquid Spray

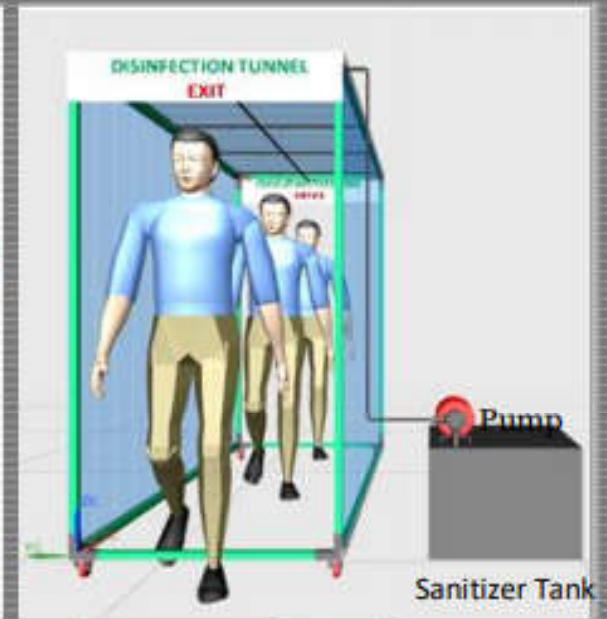

Price Range : Rs.45000 to 135000
as per size and specifications

HOW IT WORKS

The tunnel creates an obligatory passage and is equipped with, internal arc-shaped atomising nozzles that saturates the environment but preventing dispersions.

The nebulisation system is connected to a control system capable of automatically supplying the sanitising product at spray rate indicated by the manufacturer.

Operation of the tunnel is regulated with motion detection. By placing a barrier floor inside the booth, it is possible to sanitize the surface in contact with the ground.
