Oscillometric method
Pressure: 30~280 mmHg
Pulse: 40~199beat/minute
Pressure: ± 3 mmHg (0.4kPa)
Pulse: $\pm 5\%$ of display reading
1mmHg
4* AAA batteries
(-20~+55) °C Moisture: (10~95)% RH
(-5~+40) °C Moisture: (15~80)% RH

How to Use:

Put the cuff on your arm ensuring the arrow on the cuff is in the correct direction.

Make sure that the bottom end of the cuff is 2-3 cm from the elbow joint.

The pipe should be placed in the middle of the arm.

Don't make it too tight or bend the tube.

Place your arms flat on the table with your palms up and your body sitting straight. The center of the cuff should be placed at the same height as your heart position. Please note that the air tube on the cuff is not twisted.
