About Us

Advance Micronics Medical Systems, established in 2001 in Delhi, India, is a distinguished manufacturer, importer, supplier, and trader of advanced medical equipment. Over the years, we have built a strong reputation in the healthcare industry by delivering reliable and innovative solutions. Our extensive product portfolio includes Drager Evita XL Ventilator Machine, Temporary Pacemaker, Maquet Servo Universal Ventilator, Icu Medical Ventilator, Syringe Pump Device and many others, all designed with cutting edge technology to meet global healthcare standards.

Our team of skilled professionals and engineers ensures that each medical device is created with precision, expertise, and a patient centric approach, making them widely trusted in hospitals, clinics, and healthcare institutions. To maintain consistent quality, we collaborate with a network of trusted vendors carefully selected for their financial stability, technical proficiency, and ability to meet custom requirements. Our dedicated quality experts conduct regular inspections to ensure every product adheres to industry benchmarks.
