About Us

Hitech Enviro Engineers And Consultants Pvt Ltd is a reliable manufacturer and supplier of Effluent Treatment Plant, Multi Effect Evaporator, Electromagnetic Flow Meter, Inorganic Industrial Chemical, Coarse Bubble Diffuser, and more. We are also a trustworthy service provider offering Water Audit Onsite Calibration Service, etc., among many other services. All our products and services are available for our clients at market-leading costs.

Our company operates with the core principle of 360 Pollution Management, dedicated to maintaining the integrity of air and water while aligning with natural standards. We provide extensive monitoring and treatment solutions for both freshwater and wastewater, catering to industrial and domestic sectors in accordance with PCB regulations. Our offerings encompass high-quality chemicals, equipment, and services aimed at enhancing water quality for municipalities and industries, assisting clients in the effective management of water resources and addressing issues of water scarcity. With over ten years of experience, our company has established itself as a reliable partner in the treatment of water, wastewater, and drinking water.

Many industries face challenges in meeting rigorous discharge standards, and conventional technologies frequently prove inadequate. Our company utilizes state-of-the-art technology to overcome these obstacles, providing effective solutions for wastewater and air pollution. We create tailored systems, validated in pilot plants or technology centers, and engage in collaborative national and international research initiatives. Our solutions, which include energy analysis and agricultural applications, have the potential to recycle billions of gallons of wastewater each year, fostering environmental sustainability. As the global issue of water access intensifies, we remain dedicated to tackling these challenges and safeguarding water resources for future generations.
