

- Longer tyre Life
- Increase fuel efficiency
- Stable tyre pressure for long time
- Increase safety (Prevent tyre bushing)
- Increase driving comfort / better tyre grip
- No effects of temperature and moisture on Tyres
- Eliminates rim corrosion

Special Features

- TWO tyres can be inflated at a same time
- Dual 1" LED display for better visibility
- Stainless steel switches given for long life of the product
- Tyre counter given to record N2 inflation in tyres
- Heavy duty castor wheels given for easy mobility
- Modes of "Full inflation" and "Top-up only" is given to run machine in Auto or Manual mode
- Detachable outlet and inlet hose with QRC increases user comfort
- CNC fabricated powder coated finish increases durability
- Stainless steel pressure gauges (for input air tower pressure and storage tank pressure) given for better finish

Specifications

- Power : 50W/ AC220V 50 Hz
- Nitrogen purity: 95 – 99%
- Input air pressure: 8-10 kg/ cmsq
- Output nitrogen pressure: 4-7 kg/ cmsq
- Nitrogen producing speed: 2000-4000 Litres/hour
- Accuracy: +/- 1 psi
- Display model: 1" Dual LED display
- Built-in nitrogen storage tank: 85 L
- Outlet hose: 10 mtrs. with SS air Chuck
- Range: up to 150 PSI
