

3M Double Sided Tissue Tape

Color: White

Length: 50 MTR

Size: 4 FT

Type: Double Sided

Usage/Application: Tissue Tape

Description:

High performance double coated tissue tape made of conformable tissue carrier and high performance synthetic pressure sensitive adhesive.

Versatile Application Range:

Adheres well to paper, fabric, metal, and glass. Ideal for commercial and industrial binding, packaging, and splicing tasks.

Strong Performance in Moderate Conditions:

Operates efficiently within temperatures from -10°C to 80°C. Offers moderate solvent resistance. Not water-resistant or UV-stable. Best for indoor use.

Convenient Supply for Bulk Orders:

Available in rolls with 3-inch core and 65 meters length. Minimum order: 100 rolls. Suitable for dealers, exporters, suppliers, traders, and wholesalers in India.

FAQs:

1. Application:

Apply on clean, dry surfaces. Press firmly. Avoid wet or rough surfaces.

2. Suitable Surfaces:

Paper, fabric, metal, and glass.

3. Best Usage Conditions:

Indoor environments, temperature -10°C to 80°C.

4. Bulk Orders:

Minimum 100 rolls via suppliers/distributors.

5. Long-lasting Adhesion:

Clean surface, apply evenly, press firmly.

6. Benefits:

High bonding strength (>1200 gm/inch), good elongation, easy handling, invisible bonding.
