

Magnetic Transfer Blocks

Description:

Magnetic Transfer Blocks are industrial magnetic components designed for secure positioning, transfer, holding, and alignment of metallic workpieces during manufacturing and assembly operations. These blocks provide stable magnetic contact and are commonly used in fabrication units, machine shops, and production environments where repeatable handling and placement are required.

Typical Specifications:

- Product Type: Magnetic Transfer Blocks
- Shape: Rectangular Block
- Color: Grey
- Material: Permanent Magnet with Steel Housing
- Surface Finish: Industrial Finish
- Operation: Manual
- Applications: Material Handling, Positioning, Transfer and Industrial Use
