

# Magnetic V Block

## Description:

Magnetic V Block is a precision work-holding tool used to securely hold cylindrical, round, and irregular workpieces during machining, inspection, grinding, and layout operations. This model features a manual ON/OFF magnetic mechanism for easy clamping and release. The rugged metal body and V-groove design provide stable positioning and reliable industrial performance.

## Typical Specifications:

- Shape: Customized
- Size: 65 × 60 × 50 mm
- Color: Grey
- Power Supply: Manual
- Application: Motors Construction
- Surface Finish: Ground Finish
- Material: Mild Steel with Permanent Magnet
