# Bunk

**A Unique Herbal Animal Repellant.**

## Description

Bunk is a unique blend of herbal eco friendly animal repellent properties. The present concept killing and destroying the wild animals is totally over ruled by bunk. Regular sprays on boundary of farm/field helps in taking repel the wild animal away from field and do not destroy the cultivated farms or fields.

## How it work ?

It work on the principle of sense, smell & taste.

## Benefit

There is no any side effect when it will apply on crops.

It is 100% herbal products.

It protects farm / cultivated farms from wild animals & it repels the animals away from fields.

It is pesticides residue free organic constituents.

## Methodology

1. For rat, mouse, squirrel and rabbit.

This animals causes several damage in standing and cultivated crops badly. For that rat problem apply bunk solution in drip to repel from drip system.

Dose :- mix 250ml in 200 Lit water for 1 Hectre just before the drip is stop.

2. Animal coming from lower head pig & fox

This type of animals destroy the cultivated field very badly so that plants / crops will not sustain and become fail and gives loss of income from that farm for that problem apply.

For Drip

Dose :- mix 250ml in 200 Lit water for 1 acre just before the drip is stop.

For Spray

Apply from 10 min spray pump.

Dose :- Mix 40 ml in 15 Lit of water and make 8 to 10 feet belt in all boundaries of farm make sure boundaries will close properly for effective and proper results.

3. Animal having long Neck i.e. Neelgai & Fox

This type of animals with long neck distroy the cultivated field very badly so that plant/ crops will not sustain and become fail and gives tremendous lose of profit from that crops.

## Application Method :

- (i) Crop height is approximately in 3 feet than apply it in whole crops : 30-40 ml/15 Ltr. of water.
- (ii) Crop height is more than 4 feet than apply thick spray and make a belt of 6-9 feet in all borders. Make sure border must be sealed through all sides.

As well as apply the spray on first 8 to 10 rows in all sides, do not spray in whole crops : Dose - 40-50 ml/15 Ltr. of Water.

- (iii) Take empty plastic bottle and make 10-15 hole on it. then put a cotton or cotton waste in it prepare a bunk solution of 15 ltr mixing 100 ml bank in 15 ltr. of water than sock it cotton or cotton waste until it is complete wet and close the bottle with led.

Hold the bottle in 4 feet with the distance of 8 to 10 feet in all boundary sides.

**Dose** : 250 ml / 1 Hactre

It must be apply on soil.
