

(OP²)

Certified : ISO - 9001-2008

Organic Plant Protectant (Anti Virus)

The only Eco-friendly anti Virus

A Step towards the Green Revolution

The only eco-friendly anti-virus

Description: OP² is a unique blend of eco friendly viricides and Plant extracts that are known to have virucidal properties. The present concept uprooting and destroying the virus affected plants is totally over ruled by OP². Regular sprays on infected plants helps in taking 30-50% marketable crop from infected plants and checks the spread of virus into healthy ones. OP² is preventive as well as curative in action. OP² has an anti-virus action and controls a wide array of viruses like leaf curl virus, yellow mosaic virus, yellow vein virus, cabbaging virus, and many more. These viruses cause stiffness, dwarfness, curling of leaves and stops the normal growth of the plant. OP² is an effective way to control these viruses and it can also be used to prevent their occurrence and spread in future through preventive application.

Benefits:

- Only eco-friendly Anti-Virus
- Can be used for preventive and curative action.
- Being herbal based
- Immediate Results no side effects
- Controls wide range of Viruses

Target Crops: Chilies, Okra, Tomato, Papaya, Tobacco, Cucurbits, Cotton, Opium, and Spices are the main target crops.

Dilution: OP² must be diluted @ 1.5 to 3 ml / Ltr of water. Apply as a fine mist until foliage is wet - For best results, apply when the plant is cool - Do not apply immediately before or after rainfall or sprinkler irrigation or when the plant is under stress. A biodegradable surfactant NEEM OIL may be used to optimize dispersal and leaf adherence.
