

Steel Fluxes

We are engaged in offering wide range of Refractory Products which include

- Radex Insulation Powder
- NFC & Casting Powder
- Synthetic Slag
- Slag Conditioner
- GG+ Fulotic S Fumic Powder
- BCF Ladle Bottom Cleaning Flux
- All Other Minerals

Steel Fluxes

RADEX INSULATION POWDER

Use of Insulation Material to Maintaining Temperature in Ladles & Tundish in Steel Plants.

NFC & Casting Powder

Carefully graded refractory nozzle filling compound which can be made as per the requirements of the customer's need for steel transfer ladle with slide gate system.

Synthetic Slag

We also have with us extensive industry experience in successfully handling the requirements of synthetic slag that finds application in the steel making process.

Slag Conditioner

The Slag conditioner offered by us helps in adjusting Slag composition in a way that it interacts in a balanced way with steel, thus helping in maintaining proper equilibrium.

GG+ Fulotic S Fumic Powder

The quality of a variety of billet/bloom/slab produced by the continuous casting machine with GG+ Fulotic is far better due to almost zero transfer of Slag Rich In Alumina from ladle to tundish & the qualitative production ability (lesser Alumina Stringer/inclusions or nozzle clogging) of high grade special steel & alloys.

BCF Ladle Bottom Cleaning Flux

We are leading supplier of BCF Ladle Bottom Cleaning Flux. This is powerful agent flux for ladle bottom cleaning. its performance is also superb for steel manufacturers

All Other Minerals

Prominent & Leading Manufacturer and Exporter from Ahmedabad, we offer Minerals such as Fluorspar Lumps, Fluorspar Powder and Ramming Mass.
