About Us

Eddy Current Controls (I) Ltd is a name to be remembered in the field of engineering excellence, being a solutions provider as a manufacturer, supplier, and service company. With a history that goes back a long way, the organization continues to redefine benchmarks in green mobility, high-performance components, and electric vehicle solutions. Whether the quiet competence of a golf passenger cart or the unique opulence of the lovebird 2s electric golf cart, every vehicle is a manifestation of a fusion of ergonomically-inspired design, eco-friendly engineering, and superior craftsmanship.

Each battery-powered platform truck is built to perform with zero-emission transportation efficiency, and eddy current drive and current dynamometer are high-precision control solutions for dynamic industrial needs. With stainless steel casting and CNC precision-turned component options, industries are provided with robust support for heavy-duty performance as well as intricate applications. Each innovation finds its genesis in a passion for reliability, longevity, and silky user experience.

Key Facts

Nature of Business	Trader
Primary Competitive Advantages	golf carts,golf carts,
No of Staff	100
Year of Establishment	1971
OEM Service Provided	No
ProductRange	golf carts,golf carts,

Our Products

6 Seater Golf Passenger Cart

LoveBird 6S Electric Golf Cart

LoveBird 2S Electric Golf Cart

LoveBird 4S Electric Golf Cart

Electric Golf Passenger Cart

Current Drive For Diesel Locomotives

Golf Passenger Cart

Battery Operated Platform Truck

Commercial Golf Cart Maintenance Services

Current Dynamometer

Current Variable Speed Drive

Industrail AC Tachogenerator
