

Music Amplifier

The Music Amplifier is designed to enhance audio signals and deliver powerful sound output for home entertainment, professional audio setups, and public events. Featuring an integrated MP3 player, USB reader, remote control support, and line output connectivity, it provides a complete audio solution for diverse applications.

The amplifier includes automatic DC power switching during AC interruptions, ensuring uninterrupted operation. Its durable construction, modern black finish, and intuitive controls make it a dependable choice for long-term use.

Powerful and Adaptive Performance

Engineered to provide up to 200W + 200W stereo output with low harmonic distortion, this amplifier delivers clear and balanced sound across a wide frequency range of 20Hz to 20kHz. An integrated cooling fan helps maintain stable performance during extended operating sessions.

Versatile Connectivity Options

Supports multiple input sources including Microphone, AUX, USB, Bluetooth, and FM radio. These options allow seamless integration with a variety of audio devices for music playback, announcements, and entertainment purposes.

User-Friendly Design with Advanced Controls

Features an LED display panel, wireless remote control, and convenient bass and treble adjustments. The sturdy metal chassis and compact dimensions facilitate easy installation in residential and commercial environments.

Frequently Asked Questions

Q: How do I connect different audio devices?

A: Use AUX for wired devices, USB for digital media, Bluetooth for wireless streaming, FM for radio reception, and the microphone input for announcements or vocal applications.

Q: What are the benefits of low harmonic distortion?

A: Low harmonic distortion helps preserve audio clarity and minimizes unwanted noise during playback.

Q: When should I adjust bass and treble controls?

A: Adjust these settings to customize the sound profile according to personal preference and room acoustics.

Q: Where is this amplifier best suited for use?

A: It is suitable for home entertainment systems, event setups, educational institutions, and commercial audio installations.

Q: How is the remote control used?

A: The remote can be used to adjust volume, select input sources, and manage playback functions from a distance.

Q: Does the amplifier include a cooling system?

A: Yes, it features an integrated cooling fan to support stable operation during extended use.
