About Us

Aryan Machinery is a top pick for tyre retreading, servicing and repairing companies desiring for fast and effective machines such as Tube Vulcanizer, Bead Saver System, Tyre Retreading Machinery, Air Operated Tyre Test Tank and Semi Automatic Tyre Buffing Machine. We work with an intention to completely understand customers needs and provide them appropriate solutions as per desires and budget. We provide assistance to our customers on everything, from planning of project and supplying of equipment and any other type of support. In this competitive industry, only a few companies offer such services and we are the best amongst them. Whether our customers have need for tyre retreading system or tyre servicing system, we provide cost-effective systems to them, which prove fruitful in their business expansion.

Our company was established as a manufacturer by Mr. Sanju Pillai in the year 2002, and since then there has been consistency in quality as our main focus while designing and developing tyre machines and equipment. From our location, Durg, Chhattisgarh, we have been meeting quality related requirements of customers across the nation in an impressive manner. Our company possessing experienced technicians and fitters is meeting specialized needs for plants and machines linked with trye retreading and rendering after sales service in the form of Installation and Repairing of machines. We have been investing the best value in our research and development operations to create the most effective and durable products for tyres re-manufacturing and repairing companies. We have been putting cutting edge technologies into great use for ensuring fast and quality development of products. Ever since R&D department was formed, our team has been watching over modern machines and latest techniques to improve production line.
