About Us

Established in the year 2016, we, **Amjina Ventures Pvt. Ltd.** are one of the leading **manufacturers, exporters and suppliers** of a wide array of **Industrial Stainless Steel Tank, Mild Steel Lead Pot Pressure Vessel, Industrial Mild Steel Chimney, Industrial Pre Engineered Building, Stainless Steel Hood Blower** and others. These products are much admired in the market for unmatched designs, durability, perfect dimensions and corrosion & abrasion resistance. Available in variegated sizes, shapes and designs, these are in line with the globally accepted norms and guiding principles. Besides being a renowned service provider in the industry, we also offer exceptional Industrial Sheds Fabrication Services, Pipeline Fabrication Services, Modular Sheet Metal Fabrication Services, etc. at cost-effective prices.

Our client-oriented approach and optimum quality has helped us become one of most sought-after companies in the competitive industry. Our professionals have several years of experience in the domain and they scrupulously endeavor to meet the specific needs and diverse demands of the clients. They make proper utilization of our technologically advanced manufacturing unit, which also facilitates us in developing products at a quick pace with zero compromises in the quality. To delight our precious clients, we also offer them customized solutions. Under the tremendous leadership of our mentor, **Mr. Imran Ahmad (Director)**, we have been able to attain a strong client base in the Indian and international markets.

Quality Assurance

We make sure to strictly follow set norms and guidelines at each level of the business procedure. These procedures are performed underneath the supervision of our quality inspectors, employed by us. These inspectors keep a keen watch so as to eradicate the loopholes existing in the present working process. Further, we have built an in-house testing unit that is fully laced with high-end equipment, devices and tools. The sourced raw materials are properly evaluated as per the ISI standards and the finished products are also tested for durability, designing, and resistance against undesirable temperature before final dispatch. All these aspects have helped us earn the trust as well as the confidence of our esteemed clients.
