

Introducing the Fastest Manual Sorting Machine: 1:4 Sortor

1 Second, 4 Processes

1. Barcode Scanning: Quick and accurate reading
2. Dimension Measurement: Precise size detection
3. Volumetric Weight Calculation: Efficient weight assessment
4. Bin Positioning: Seamless sorting to designated bins

Boost Your Sorting Efficiency with the 1:4 Sortor

FAST SORTER SYSTEM-S4

Dimensioning, Weighing, Scanning, Sorting

Fast Sorter S4 Solution

Measurement of ultra-thin items

100x100x20 to
500x400x400 mm
Parcel size range (LxWxH)

1707x726x2115 mm
System dimensions (LxWxH)

4
Number of discharges

FAST SORTER SYSTEM

Technical Details-Overview

100x100x20 to
500x400x400 mm
Parcel size range (LxWxH)

20g to 30 kg
Parcel weight range

Upto 1500-2000 Parcels/hr
System Capacity

≥ 10 Mil
Barcode Size

50Gb STD (Customizable)
Image Storage Feature

**Easy deployment with
support for
plug-and-play**

FUNCTIONS :

1. Barcode Scanning
2. Weighing
3. Dimensioning
4. Sorting
