

Industrial RO Water Purification System

Product Specifications

- Production Capacity: 1,000 litres of purified water per hour (LPH).
- Body Material: Durable stainless steel construction for corrosion resistance and long service life.
- High-Pressure Pump: Premium Lubi branded pump for reliable and efficient operation.
- RO Membranes: Four 4×40 inch RO membrane elements with a filtration accuracy of 0.0001 micron for superior water purification.
- Pre-Treatment System: Equipped with a Sand Filter and Activated Carbon Filter to remove suspended particles, chlorine, and impurities, enhancing membrane life.
- Flow Meter: Automatic flow meter for accurate monitoring of water flow.
- TDS Meter: Integrated TDS meter for continuous monitoring of purified water quality.
- Application: Designed for industrial water purification applications requiring consistent, high-quality output.
