

Natural Quick Lime Lumps

Product Overview

Natural Quick Lime Lumps are high-calcium quicklime produced by calcining premium limestone. They are widely used in steel, construction, chemical, sugar, water treatment, paper, and environmental applications.

Features

- High calcium content
- Fast and efficient reactivity
- Low impurities
- Strong heat generation on hydration
- Available in different lump sizes

Applications

Steel plants, cement, AAC blocks, sugar industry, effluent and water treatment, mining, chemical processing, flue gas treatment, and soil stabilization.

Storage

Store in a dry, moisture-free area in sealed bags or covered storage.
