

## LIFE (High Performance Biofertilizer)

### Applications of Biofertilizer "LIFE"

**FRUITS TREES:** Grow more, sell more and earn more with LIFE.

**ROW CROPS:** Slash your treatment costs, improve your profitability with LIFE

**VEGETABLE GARDEN:** Use LIFE for more money with rapid growth, healthier plants and higher yields

**FLOWER GARDENS:** Get more, larger and brighter flowers attracting better price and higher profits! Use LIFE for your flower gardens

**PLANTATION CROPS:** Boost the yields of Tea, Coffee, Medicinal Plants, Cardamom and other spices naturally with LIFE

**OIL PALMS:** To prevent wastage of fertilizers, use LIFE. It saves up to 70% of fertilizer costs

**LAWNS:** Feed & Protect your lawns in the natural way. Keep the disease-causing microbes at bay by using LIFE

**GREEN HOUSES:** Grow healthy green house exotics, flowers and ornamentals of desired size and colour with LIFE

**HYDROPONICS:** Use LIFE for increased nutrient availability, improved water quality and clarity, reduce sludge and algae accumulation, reduce fungal attacks

Egg Plant treated with LIFE

Egg Plant treated **not** treated with LIFE

Indian Beans Plant treated with LIFE

Indian Beans Plant not treated with LIFE

*Note: The treated plants of vegetables are resistant to infections and infestations  
The untreated plants show infestation by insects (shown by arrows)*

Treated with LIFE

Not treated with LIFE

Field Trial of LIFE with Chrysanthemum  
One foot scale used for reference (see arrows)  
Please note the difference in the height of the plant and number of flowers per plant

# LIFE

**(High Performance Biofertilizer)**

LIFE is a ready to use product. Performance microbes in biofertilizer LIFE are a boon to farmers. Fixing of the inert Nitrogen to bio-available nitrogen forms and mobilization of residues of chemical fertilizers from soils are main benefits offered by LIFE. It also releases a number of biomolecules which help plant growth and build immunity against pests and diseases. Quicker germination and better root system are some additional benefits of LIFE.

**Thus LIFE helps the soils as well as plants.**

LIFE is a concentrated blend of a range of non-GM microbes. The concentration (count) of these microbes has been so adjusted that a spoonful of LIFE may consist of over 5 billion live cells. The concentration of each microbe has been adjusted at an optimum proportion during production process.

LIFE consists of Solubilizers of macro-and micro-nutrients such as Azospirillum, Rhizobium, Phospho-bacteria, Potassium-bacteria, Zinc bacteria, Cellulose bacteria, Bacillus sp, Pseudomonas sp. etc. The friendly microbes in LIFE get promptly into action performing their assigned functions. Simultaneously they start self multiplying to maintain the microflora at the best levels for the soil and the plants.

Prompt results are often required at the farms and gardens. LIFE stands out here. When you have stressed out plants, you need to promptly apply the nutrition and rejuvenate the plants at the earliest to avoid loss of the plant or the produce. You need a product which can be used immediately at the time of emergency. LIFE can be applied within minutes of the notice. For ease of use, it can be diluted at the time of application with plain water.

**No need of prolonged soaking or messy week long preparation at site.**

LIFE is a strong root stimulator and also leads to plenty of lush green foliage. LIFE also prevents early drop of flowers and fruits. LIFE imparts to the plants the resistance to fight diseases, pests and weather conditions. This makes it ideal for vegetable and flower gardens, row crops, fruit trees, plantation crops and ornamentals. It is recommended also for use in home gardens, green houses, and hydroponics. It can be applied using irrigation, drip, or spray. LIFE is a completely bio-degradable, eco-friendly product and is harmless to man, animal, avian & aquatic life forms.

**Timely use of LIFE may lead to better flowers and fruits.**

**LIFE can be used for Lawns/Turf, Horticulture, Vegetables, Flowers, Row Crops, Oil Palms, Green Houses, Home Gardens and other agriculture and related applications**

**LIFE can be applied by irrigation, drip or drench sprinklers and aero sprays**
