

A SQUAR FORGING

GST No. 19AMAPS0374F1Z2

Factory & Warehouse : Jalan Industrial Complex ,Gate no – 1
Right Lane -3 , NH – 6 Bombay Road, Biparna Para, Domjur
Howrah - 711411

Email : asquarforging03@gmail.com

Phone : +91 8116914707, 9874776141

“YOUR TRUSTED SOURCE FOR COMPLETE LT/HT & OVERHEAD LINE SUPPLIES”

ASF, established in 1995 by Mr. Sk Azizul, is a leading manufacturer of Distribution & Pole Line Hardware Fittings, Galvanized Fabricated Structures, and Earthing Materials.

With 29+ years of expertise, we deliver products known for high Quality, Precision, and Reliability.

Our advanced manufacturing facilities and strict quality checks ensure flawless performance and on-time delivery. Backed by strong R&D and technical teams, we continuously innovate to meet evolving project needs.

GI FABRICATED MATERIAL

11 KV V CROSS ARM

- **High-strength hot-dip galvanized steel** for long-lasting corrosion resistance.
- **Precision-engineered design** ensuring accurate conductor spacing and stable load support.
- **Suitable for all 11 kV distribution line installations** with excellent mechanical strength.

T CROSS ARM

- **Hot-dip galvanized steel construction** for superior durability and rust protection.
- **Accurate fabrication** ensuring perfect alignment and easy installation on poles.
- **Optimized conductor spacing** for reliable 11 kV and LT distribution line support.
- **Weather-resistant and high-load capacity** ideal for long-term field performance.

Top Hamper / Top Bracket

- **Hot-dip galvanized steel construction** ensuring superior corrosion resistance and long service life.
- **Precisely fabricated design** for accurate pole-top mounting and stable conductor support.
- **High mechanical strength** suitable for LT/HT distribution line installations.

STRAIN PLATE

- **Hot-dip galvanized steel body** for superior corrosion resistance and long service life.
- **High tensile strength** to withstand heavy conductor tension and mechanical stress.
- **Accurate hole alignment** ensuring easy installation and secure hardware connection.
- **Reliable performance** in harsh weather and high-load transmission environments.

Channel Cross Arm

- **Hot-dip galvanized finish** ensuring superior rust resistance and extended service life.
- **High mechanical strength** suitable for load-bearing and structural applications.
- **Accurate dimensions and smooth edges** for easy fabrication and installation.

GI Angle Cross Arm

- **Made from high-strength galvanized steel angle**, ensuring excellent durability and corrosion resistance.
- **Precision-cut with accurate hole spacing**, making installation faster and more reliable.
- **Provides stable conductor support** for LT/HT overhead distribution lines.

HARDWARE & CLAMPS

SINGLE BOLT T&C

SINGLE BOLT B&S

2 BOLT T&C

2 BOLT B&S

4 BOLT T&C

4 BOLT B&S

Suspension Hardware

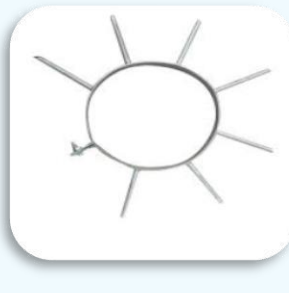

Spindle 11/33KV

3 BOLT B&S

Substation Clamps

Anti-Climbing Clamps

Shackle Strap

11/33KV GI & LT PIN

11 KV GI PIN

33 KV GI PIN

LT PIN 6"

LT PIN 10.5"

OUR CLINTS

We are proud to be trusted by leading clients who rely on **A SQUAR FORGING** for consistent quality and dependable performance.

Their long-term association with us reflects our commitment to precision manufacturing, on-time delivery, and customer-first service.

We value each client relationship and continuously strive to provide products that meet and exceed their project expectations.
