### Who We Are

Established in year the 1986, Vinis Products is one of the industry leaders in plastic injection molding & blow molding articles.

Our Blow Molded Containers are in huge demand across various markets. We also provide a high volume of Caps & Closures that are widely appreciated in the market.

Along with that we offer the best quality Medical Health & Veterinary Syringes that are cost effective. We are also pioneers in manufacturing of automatic syphon pumps.

Vinis  
Products  
Pvt.Ltd.

*[Design, Innovation and  
Production]*

## Facing Challenges in Transferring Liquids and Acids from Big Containers?

### Conventional Method of Transferring liquids!

#### 1- By Tilting

- The drum or large containers from which the liquid is to be transferred may slip causing the liquid to spill, hence loss of precious raw material.
- Very unsafe/ risky method, since there is risk of injury to workers either due to spillage or skidding of the container.

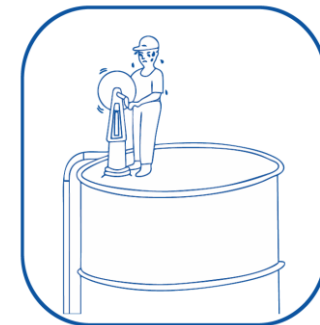

#### 2- By Using Tube

- Oral risk because the liquid may enter the worker's mouth and digestive system.
- There is a considerable amount of wastage due to spillage.

#### 3- By Using Paddle Based Pump

- It is a laborious way since one must keep on paddling continuously for a long time.
- It needs one person to rotate the paddle, so sheer wastage of time and labor both.
- Too expensive compared to ours.

## Automatic Kerosine & Industrial Pump

It works with 5-20 liters Jerry can/15kg tin with height not exceeding 330 mm.

**Internal Diameter** – 8 mm

**Tube Length** – 85 mm & 1250 mm

## Vini Syphon Pump

India's leading manufacturer & supplier of syphon pumps with comprehensive range of solutions and years of expertise we help various industries such as

- pharmaceuticals,
- chemical,
- agro-chemicals,
- automobile,
- beverage industries,
- cosmetic & perfume industries and
- food processing companies.

**Click Below on YouTube Video – How to use**

## Automatic Barrel Pump

It works with 200 liters Barrel/ Drums / Flat Tanks with height not exceeding 910 mm.

**Internal Diameter** – 14 mm

**Tube Length** – 2000 mm

## Pharmaceuticals Bottles

Our Pharmaceuticals Bottles are made from high quality HDPE polymer. We also follow strict and rigorous quality systems to monitor these medical products.

Our manufacturing setup for injection molding machine ranges from **15 T to 130 T**. We also have wide range of Blow Molding Machine from to **10 ml to 2 Liters**.

## Veterinary Syringes

We also provide quality push syringes to the whole sale market. Our push syringes are both economical & well designed to handle. Syringes are available in a multitude of custom sizes, colors and options

## Ink-Cartridge Bottles

We offer premium quality ink-cartridges and reservoir for printing industries. These products are made from HDPE polymer.

## HDPE Bottles - Oil Storage

Betadine & Wokadine Powder Bottles (5gm & 10gm)

Eye- Drop Bottles

Storage Wide-mouth Jars

View- Strip Bottles

Agro-Chemicals Bottles

Chemicals Bottles

Pharma Bottles

Printed Bottles for Medicines
