About Us

VIKRANT CRANES INDIA PRIVATE LIMITED is one of the distinguished companies in the material handling equipment manufacturing industry, and entrusted across the world for engineering, developing and exporting the-top-of-the-line EOT Cranes, Overhead Cranes, Goliath Cranes, Overhead Hot Crane, Double Girder EOT Crane and Girder Goliath Cranes which are suitably efficient in lifting the ponderous weight over towering heights. Founded in 1983, we, the company, design and develop the Cranes in a number of configurations according to applications. Since we have been firm in commitment towards quality since our inception, in manufacturing, exporting, supplying and service of Goliath Cranes provided not only to Indian but also to international clients based in South Africa, Gulf and African countries for the last three decades. Capitalizing on rich industrial experience, advanced production infrastructure and profound expertise, we hold a great repute in both the local and the global markets.

Our models of Goliath Cranes, Overhead Hot Crane and Girder Overhead Cranes are made out of robust Jib and high-test ratable carriage, so symbolizing notable features encompassing outstanding lifting capability and reliability for heavy weight-load lifting. Our commitment to offering premium quality Goliath Cranes on ground of construction, operation and performance which match up to the international benchmark and comply with industrial manufacturing norms, assists us in establishing a wide client base.

Exclusive Characteristics

We assume an innovative approach and the leading mechanism following well elaborate business strategy in order to streamline manufacturing technique, enhance material selection, resulting into the best quality of Industrial Overhead Cranes which promise the high-test electrical & mechanical attributes and optimal uploading solutions that one can avail at fairly competitive price. Our automatic manufacturing plant is well furnished with hi-tech machines, that enhances our capability together with our dedication and diligence to successfully meet our clients requirements and demands. Therefore, we have been deemed a leading name and captured a strong hold in the industry.

Overhead Cranes

Overhead Cranes are designed with modern software and smart features to ensure to provide complete and efficient control over different material handling systems. These cranes are developed for making the lifting processes easier and efficient.
