

ABOUT US

We, Monarch Graphics (I) Pvt. Ltd. are an ISO9001:2015 accredited printing unit based out of Noida, NCR Delhi. We are engaged in providing value added printing services as per exact requirement of our clients. Thus by capitalizing on our best available print technology and sound resources, we provide qualitative printing services in self-adhesive labels, un-Supported Synthetic Paper Medias, Tag Board and Polyesters materials.

In addition, we specialize in offering various print decoration techniques like Hot foil stamping, UV varnishes, Cast N Cure and Tactile Effects for creating visually attractive labels. We have a team of qualified and experienced people to understand, suggest and implement, various customer requirements ranging from application of labels to creating enhanced brand recall to meeting various legal requirements.

RESEARCH & DEVELOPMENT

In line with Management Vision of "Labelling a Smarter Future", Monarch's R & D is staying focussed on developing sustainable, safe and innovative labelling solutions that impacts brands recall, increased sales and operational efficiency for end users. This is being achieved through focused teams, investment in latest technologies and knowledge of operating in various verticals.

Branding Products

The Monarch Print infrastructure and product offering are in line with the expectations of Brand Managers of major FMCG, Pharma, Food, Beverages and Nutraceutical Co's. who want no look labels, labels in various finishes, pantone shades, printing on foil, textured varnishes and many more. We also supply high performance Tire Branding labels in various looks and finishes. We also work closely with apparels industry by supplying non staining size strips, Roll form Tags, Price Hiding Labels.

Special Print Decoration

We specialize in giving value added features to our prints by using the knowledge and experience of our team and process partners. This helps us to create labels which can have security features like hidden text, micro text and gulloche patterns which can't be imitated. We also use various security inks to make copying difficult. We glorify our prints by using in line rotary screens, by using different kind of foil and emboss effects we convert labels which shows our versatility as a printing unit.

Performance Products

This segment of labels is testimony to our experience of handling various applications from security to adhesive performance to long lasting durability. We provide labels which can withstand extreme temperatures of minus 180degrees to plus 600degrees along with top coatings to resist abrasions and chemical spillage. We offer various customized security solution for anti-counterfeiting, UL approved materials to RFID tags inserted labels.

Thermal Transfer Products

The data Capture Labels segment focuses on Thermal Transfer Labels, Direct Thermal Labels, A-4 Label sheets and Ribbon. We have created a portfolio of highly competitive product delivering high performance and value for warehouses, logistics companies, automobiles and electronics industry. We also have a range of non Tearable Medias for plant identification, Steel Manufacturers & Pharma companies to use for identification during WIP.

Inkjet Label Products

Printing in house and on-demand gives labels end users the operational versatility to produce their own labels, in any variety, precisely as they need them. On demand printing is an economic advantage particularly for shorter runs and versioning and it also enables new modes of marketing and promotions. We have various materials in stock to in paper and films which can be used on inkjet printers.

MISSION

To accurately satisfy the need of our clients, achieving a good ROI with a growth rate along with profitability, we need to focus on future challenges & sustainable solutions.”

Monarch will develop its business through constant upgradation in technology and addition of new products to its portfolio.

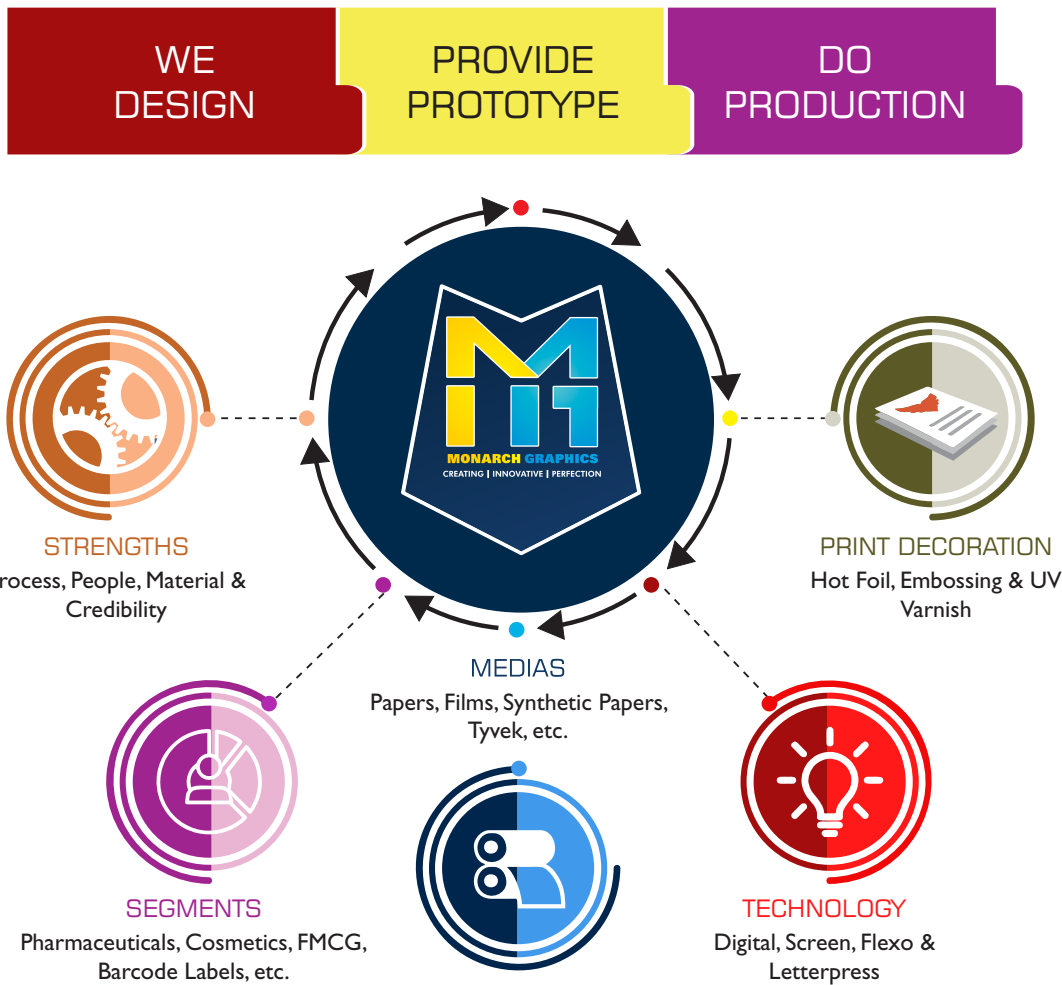

VISION

LABELS FOR ALL PURPOSES

Labels are everywhere and in everything we consume. Wrapped around food, beverages, cosmetic and medicines, to name a few, they build brands, convey important information and tell stories. Despite this, the relevance of labels in packaging is rarely thought of in the large scale of our circular economy.

On close inspection you will realise that labels are high performance products. Billions of self-adhesive labels are used for data capture and company branding in production, logistics and manufacturing. They may be applied to track or trace goods, optimise workflow, identify and brand products or offer the consumer important information. Inevitably the demands made on the label will change with every product.
