

## DOXI 100L Tablets Description

DOXI 100L Tablets contain Doxycycline Hydrochloride and Lactic Acid Bacillus, commonly used for the treatment of bacterial infections. Doxycycline is a broad-spectrum antibiotic that helps control bacterial growth, while Lactic Acid Bacillus supports gut health during antibiotic treatment. These tablets are generally prescribed for respiratory infections, skin infections, urinary tract infections, and other bacterial conditions. The medicine should be taken strictly under medical supervision and according to the prescribed dosage.
