About Us

In the year **1999**, **Krishna Enterprise** was established with an objective to become the No. 1 choice when it comes to buying industrial pipe fittings. The immense experience and great knowledge we hold in this domain made us a prominent **manufacturer, trader and supplier**. With the optimum usage of our machines, manpower, technology and other resources, we are manufacturing a qualitative range of **Adopter Union Nipple, Female Pipe Fitting, Pin Type Anchor Bolt, Cable Trays, Air-Water Hose, Hydraulic Pipe Fittings** and varied others. Made up of top-class raw material, all these goods are better known for their salient features like corrosion resistance, simple installation, accurate dimensions and perfect designs. We have a modern production house where all these items are produced in compliance with the industrial standards. Over the years, we have successfully overcome several challenges under the guidance of our proprietor, **Mr. Manmohan Varandani** who is the backbone of the company.

Quality at Top

As a quality-centric business enterprise, we always remain focused towards maintaining highest standards in our product line. To offer only the best to our valuable customers, we make use of only finest raw material like steel, stainless steel, iron, cast steel, etc. We have made association with reliable vendors from whom we source the raw material at best prices. Whether it is the raw input or the final products, complete inspection is done on both of them by our quality controlling department. Parameters on which our end products are examined includes durability, dimensions, corrosion resistance, operations and varied others.

Strong Workforce

We are glad & proud to have talented, dedicated and motivated professionals in our team who are one of the biggest support of the company. The professionals working in our firm are hired on the basis of their knowledge, qualification, experience and skills. Our team comprises engineers, production heads, supervisors, managers, customer support executives, quality examiners, etc. All the members in our team are well-versed with the advanced technologies and work in sync with each other.
