Danozolis

Danazol 50mg, 100mg & 200mg Capsules

- A synthetic steroid with antigonadotropic and anti-estrogenic activities
- Effective in relieving painful symptoms related to endometriosis when compared to placebo
- Highly effective for the relief of premenstrual mastalgia
- Significantly more effective than norethindrone in reducing the excessive menstrual blood loss of women with unexplained menorrhagia.

- Endometriosis • Fibrocystic Breast Disease
- Menorrhagia • Premenstrual Syndrome
