Product Type	: MS Props
Components	: Tubes
Surface Treatment	: MS, GI
Application	: Structure Pipe, Construction, Interior Refurbishing
Color	: Blue, Black

Cuplock Scaffolding

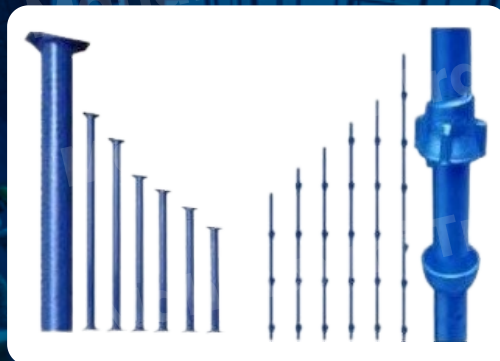

Cuplock Scaffolding Manufacturers in India

Are you looking for the leading Cuplock Scaffolding Manufacturers in India? If yes then Mahalaxmi Traders is the right destination for you to meet your Cuplock system requirements for supporting vertical loads and for general access. We manufacture these Cuplock systems by using the optimum quality of basic material.

Standard Size of Ledger

Size in Metres	Weight
Ledger 0.5 Mtr.	2.00 kg
Ledger 1.0 Mtr.	3.75 kg
Ledger 1.5 Mtr.	5.46 kg
Ledger 2.0 Mtr.	7.15 kg
Ledger 2.5 Mtr.	8.50 kg

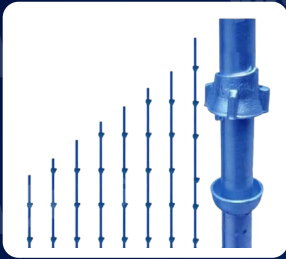

Standard Size of Vertical

Size in Metres	Weight
1.00 Mtr. : 2 Cup	04.70 kg
1.50 Mtr. : 3 Cup	06.80 kg
2.00 Mtr. : 4 Cup	09.00 kg
2.50 Mtr. : 5 Cup	11.50 kg
3.00 Mtr. : 6 Cup	13.65 kg

Vertical standards are made out of 40 NB "B" Class tube conform to IS 1161/1239. Pair of cups are provided at 500 mm C/C, but cups at 1000 mm C/C are available on request.

Cuplock Verticals

Cuplock vertical is a vertical post with cup-shaped connectors attached at regular intervals. These cups provide a secure and efficient way to connect horizontal ledgers creating a stable framework for workers to access higher levels of a structure.

Cuplock Ledger

Cuplock horizontals are horizontal members with cup-shaped connectors at both ends for quick, secure connections to verticals. Available in various lengths, they provide horizontal support and distribute load evenly across the scaffolding.

U Jack

U jack is a vertically adjustable device used to provide stability and support to scaffolding structures on uneven or sloping surfaces. This design allows for easy height adjustment by simply rotating the threaded rod.

Base Jack

Base jacks are typically placed at the base of scaffolding verticals and are used to level and stabilize the scaffold. They can be adjusted to accommodate variations in ground levels, ensuring a secure and level working platform for construction workers.

Adjustable Props

An adjustable steel prop is a versatile and adjustable support device used in construction and formwork applications. It consists of an inner tube and an outer tube that can slide and lock into various height positions.

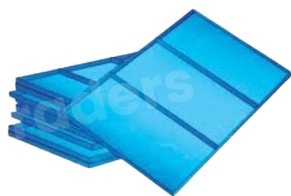

Acrow Span

Acrow span, also known as an adjustable span. It is designed to provide horizontal support between two vertical structures or surfaces. It consists of two or more tubular sections that can slide within each other, allowing for adjustable length.

Centring & Scaffolding Material

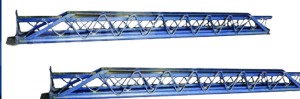

From centring plates and shikanja to cuplock systems and u jacks, we have all the essential materials for solid construction support.
