WHY DIAS IS AN INTELLIGENT CHOICE ?

PARAMETERS	UNORGANISED SECTOR (OTHERS)	WELL KNOWN BRANDS	DIAS	EXPLANATION
RAW MATERIAL	Scrap	Ingots / Super Quality Scrap	Ingots / Super Quality Scrap	Ingots contain approx. 58% copper, less Than 1.5% lead where as there is no Such parameters in scrap, hence ingots Ensures the quality of the raw materials That is used in making the faucets.
ELECTROPLATING	Out sourced with no control and defined parametrs	Inhouse electroplating With control and defined Parameters	Inhouse electroplating With control and Defined parameters	
ASSEMBLING AND BOUGHT OUT PARTS	Uncontrolled parameters	Through quality control	Through quality Control	
MATERIAL HANDLING	No Proper Procedure Followed	In trays to maintain aesthetic Appearance	In trays to maintain Aesthetic appearance	
POLLUTION CONTROL	Nil	Proper Use Of Duscts, Collection And Effluent Treatment Plant	Proper use of duscts, Collection and Effluent Treatment Plant	
LEAKAGE TESTING	No Proper Way	Yes , Done after machining and turning	Yes , Done after machining and turning	
FLOW TESTING	No Proper Way	Yes	Yes	
CHROME THICKNESS TESTING	No Proper Way	Yes	Yes	
VISUAL INSPECTION	No Proper Way	Yes	Yes	
FLOW	Scattered	Streamlined	Streamlined	Scatterd flow leads to wastage of Water and also makes the area near The tap ditry.
PRICE	Low	High	Lower than the well known brands	

Verdict : DIAS fulfills all the Parameters that well known brands follow yet it is cost effective than the well known brands.
So Dsons offers value for money.

Launched By: Nusrat Jahan

Sourcing – Brass is sourced from the most reputed vendors and is inspected by its QC staff before it is sent for casting.

Casting – Virgin brass and scrap is casted in various molds as per the pattern using the Gravity Die Casting process. Burnt cores are thus meticulously removed from the cast products.

Machining – Cast products are machined as per the design requirements to create threads.

Grinding – The machined product is thus grinded using belt grinders to achieve smooth finishes without sharp edges.

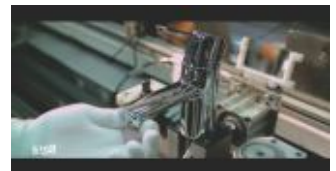

Polishing – The grinded pieces are polished on high speed polishing machines by experienced workers to achieve perfect surface with high glass and sheen.

Plating – The tested and okayed pieces then undergo the process of Plating. The range of Plating include – Nickel, chrome, Epoxy Powder Coating, Electro Fureti coating etc.

Testing - Having undergone the above process, the pieces are then meticulously checked for surface defects, the water carrying components are pressure tested using Hydraulic Testing Machines at a pressure of 50 to 100 PSI to detect any leakage in the casting

Assembly - The coated pieces are assembled as per the requirements. The assembled pieces are once again checked and tested with hydraulic pressure. The tested and approved pieces are then packed corrugated color boxes that go into wooden crates or jute lined corrugated boxes. The packed goods are then subject to the random checking by the management.

MAKING DIVERTER

INSTALLATION HASSLE FREE

Dias Diverters come with 10 Years Warranty against any manufacturing defect.

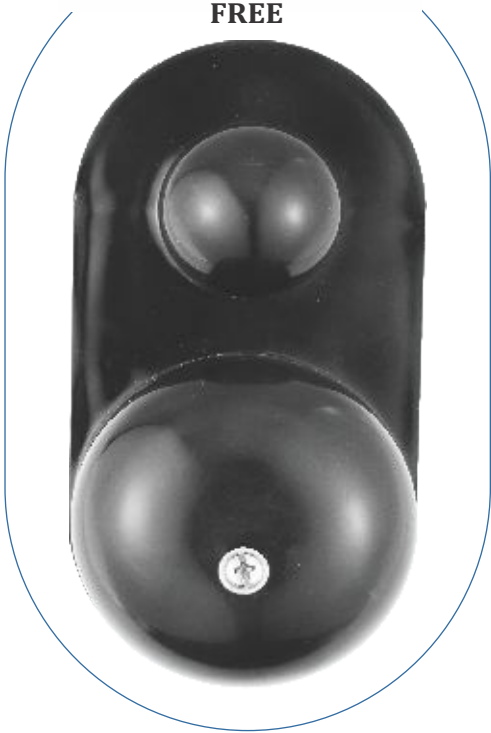

All spare parts are easily available

BEST IN CLASS BORE SIZE

4 Way inlet 10mm, outlet 12mm
5 Way inlet 10mm, outlet 12mm

High Flow- Inlet 13 mm Outlet 15 mm

With best in class bore size, you can free flow of your shower even in low pressure

12 lpm WATER FLOW EVEN AT LOW HEIGHT TANK

India's only Diverter which gives you 12 litre / minute (lpm) water flow at 20 feet low tank height.

Water Flow in single handle Diverter Catridge

1. Bar water pressure	30 feet tank height	16 LPM
2. Bar water pressure	60 feet tank height	26 LPM
3. Bar water pressure	90 feet tank height	28 LPM
