

PERMA RAPID REPAIR

AN EFFECTIVE QUICK REPAIR MORTAR

DESCRIPTION

Perma Rapid Repair is a free flowing fine powder designed to achieve a quick repair system for concrete structures. The product achieves very high strength within minutes.

COMPOSITION

Perma Rapid Repair is composed of a blend of portland cements and sands.

PRIMARY USES

Perma Rapid Repair is suitable in the following areas:

- 1) To repair edges of columns and beams damaged during deshuttering.
- 2) To repair ceiling concrete damaged while deshuttering.
- 3) To repair edges at doors and windows.
- 4) To repair general honey combs.

ADVANTAGES

- 1) Perma Rapid Repair becomes hard and achieves high strengths within minutes of repair.
- 2) It is non shrink.
- 3) It is easy to use.
- 4) It is economical to use.
- 5) Replaces costly phenolic resin system.

DIRECTIONS FOR USE

Mix small quantity of Perma Rapid Repair powder with water. Quantity should be just enough for consumption within minutes or else it will set in the pan itself. Select water quantity such that the mix is just workable, neither too stiff nor a slurry. Using a spatula or a small trowel apply the dough of Perma Rapid Repair and shape it from the edge immediately.

CURING

After the material has sufficiently hardened i.e. after two or three hours moisture cure the repaired area.

SUBSEQUENT FINISHES

Areas repaired with Perma Rapid Repair are suitable for subsequent decorative finishes and can be painted over.

PROPERTIES

Form	:	Free flowing light coloured powder
Bulk density	:	1600 kg/m ³
