

PERMA PLASTER MIX PLASTERING MORTAR

A READY TO USE NON SHRINK PLASTER MIX

DESCRIPTION

Perma Plaster Mix is a grey free flowing powder which needs only addition of water to form a good consistency mortar. Perma Plaster Mix is a mortar mix with lot of advantages over conventional mortars.

PRIMARY USES

For small repair works and plastering patch up works there have been lot of inconveniences. Bringing sand, sieving and mixing the mortar for Plaster have worked out very expensive for small repair jobs. Such small repairs of plasters have created shrinkage cracks. To avoid all these difficulties, Perma has introduced Perma Plaster Mix a ready to use plaster mortar for plastering. Perma Plaster Mix just requires addition of water to produce plastering material with the least hassles and all the advantages.

ADVANTAGES

Perma Plaster Mix produces absolutely non shrink mortars. It is economical when compared with the inconveniences of procuring and sieving right grades of sand. The material is workable and has ease in application.

DIRECTIONS FOR USE

Just take desired quantity of Plaster Mix in a pan, add water, mix it to desired consistency and apply on prepared wet surface. Cure normally. On difficult surfaces or on concrete surfaces use Perma Bond PVA as a primer before plastering.

CURING

Curing should be carried out after plastering.

PACKING

10kgs, 15 kgs and 25 kgs sack.

SHELF LIFE

One year from the date of manufacture, if stored in dry and cool place away from moisture.
