About Us

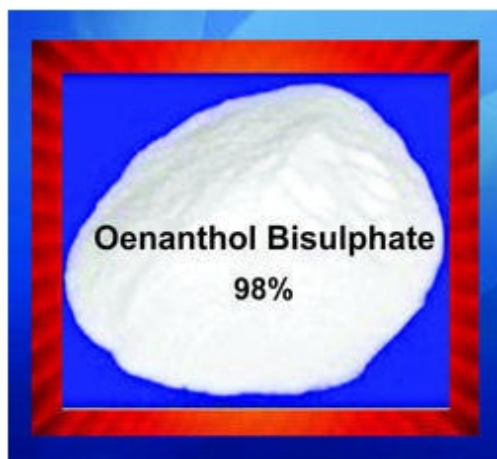

The benefits of pesticides, not only on the quality of the produce but also on the net crop yield, is well documented with scientific surveys and agricultural research inferences ascertaining to their numerous advantages as well as importance. Seeking to back the agricultural scenario and improve crop quality, Vadodara Agro Sciences offers an expansive range of Biocides, Bio Fungicides, Organic Fungicide, Oenanthol Bisulphate and plant growth regulating compounds, whose effectiveness is trusted by farmers across the demand demographics.

Since the inception of our company in 2012, we have pioneered the development of a number of pesticides which quickly became an ideal choice of farm hands and agricultural personnel. Backed by a highly ambitious posse of experts possessing vast experience, we have cemented ourselves as a noted Manufacturer, Supplier and Trader of products such as Insecticides, Herbicide, Fungicides, Organic Fungicide Oenanthol Bisulphate, Natural Fungicide Oenanthol Bisulphate to name a few.

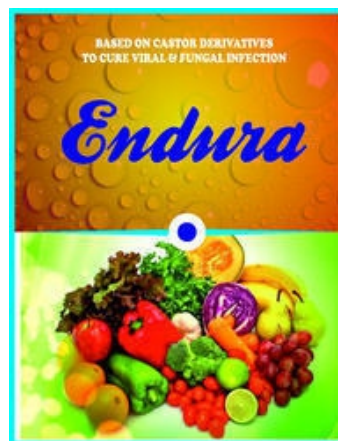

Quality Assurance

Vadodara Agro Sciences has always strive for maximizing the final productivity and enhance the level of net yield acquired from the agricultural produce, and the economic prospects of farmers and peasants can be improved. Keeping in line with the same principle, we have taken the route of research and innovation that can aid us in developing even better iterations of plant growth regulators and biocides that can effectively reduce the productivity negating effects of pests. To produce such an effective range of chemicals, we ensure that the raw materials and chemical substrates we procure are of supreme grade and are processed using advanced techniques and cutting edge machines under supervision of a team of experts, to make them truly stand apart.
