About Us

The history of Dycon Chemicals dates back to 13 years ago, when we began operating as a manufacturer of an ample array of chemicals. Butylated Hydroxytoluene, Chlorinated Polyethylene, DP Rosin, Ester Gum and Maleic Resin are to name a few. It was the high quality standards of our offerings and the modern sales strategies that our sales have been continuously increasing with time. However, there are some chemicals that are not available in the Indian chemical market. To have access to such chemicals and experiencing their increasing demands, we began importing those from International markets including Taiwan, South Korea, Italy, France, Thailand, China and Singapore. Thus, being one of the best importers of chemicals.

Dycon Chemicals deals in an ample array of chemicals including Maleic Resin, Butylated Hydroxytoluene, DP Rosin, Ester Gum and many more of unmatched quality. The facility we own is based in Mumbai, Maharashtra, India that is well-operated by our experienced employees and a strong vendor base. We have also outfitted this facility with all the requisite, modern resources enabling us to carry out businesses efficiently. By making optimum use of all the resources, we are fulfilling all urgent and immediate orders of our valuable clients at quite affordable prices. We are a 2008 established company. With such a great business experience in the Indian chemical industry, we are achieving the best results for us and our clients. Thus, contributing to the growth of this sector.
