# HIGH HUMIDITY IN THE HOME

Molds grow in all homes and flourish with excessive moisture, high humidity and especially with abundant rainfall. Growing on almost any surface, they cause severe damage to valuables such as musical instruments, camera equipments, leather goods and wooden furnishings.

## AVERAGE HUMIDITY LEVEL IN THE HOME

- 30% - 50% ● Air-conditioned Bedroom
  - 70% - 90% ● Living Room
  - > 80% ● Walk-in Wardrobe & Bathroom
  - > 80% ● Laundry Area
  - 80% - 90% ● Basement /Open-Air Storage Area
- \*Relative humidity is subjected to change based on Indian weather conditions

### MUSTY SMELLING BOOKS & COLLECTIBLES\*

Relative Humidity 70%-90%

👍 Ideal Relative Humidity 40%-45%

### MOLDY UPHOLSTERY

Relative Humidity 70%-90%

👍 Ideal Relative Humidity 40%-45%

### DAMAGED MUSIC EQUIPMENTS\*

Relative Humidity 70%-90%

👍 Ideal Relative Humidity 40%-45%

### WARPED WOODEN FLOORINGS\*

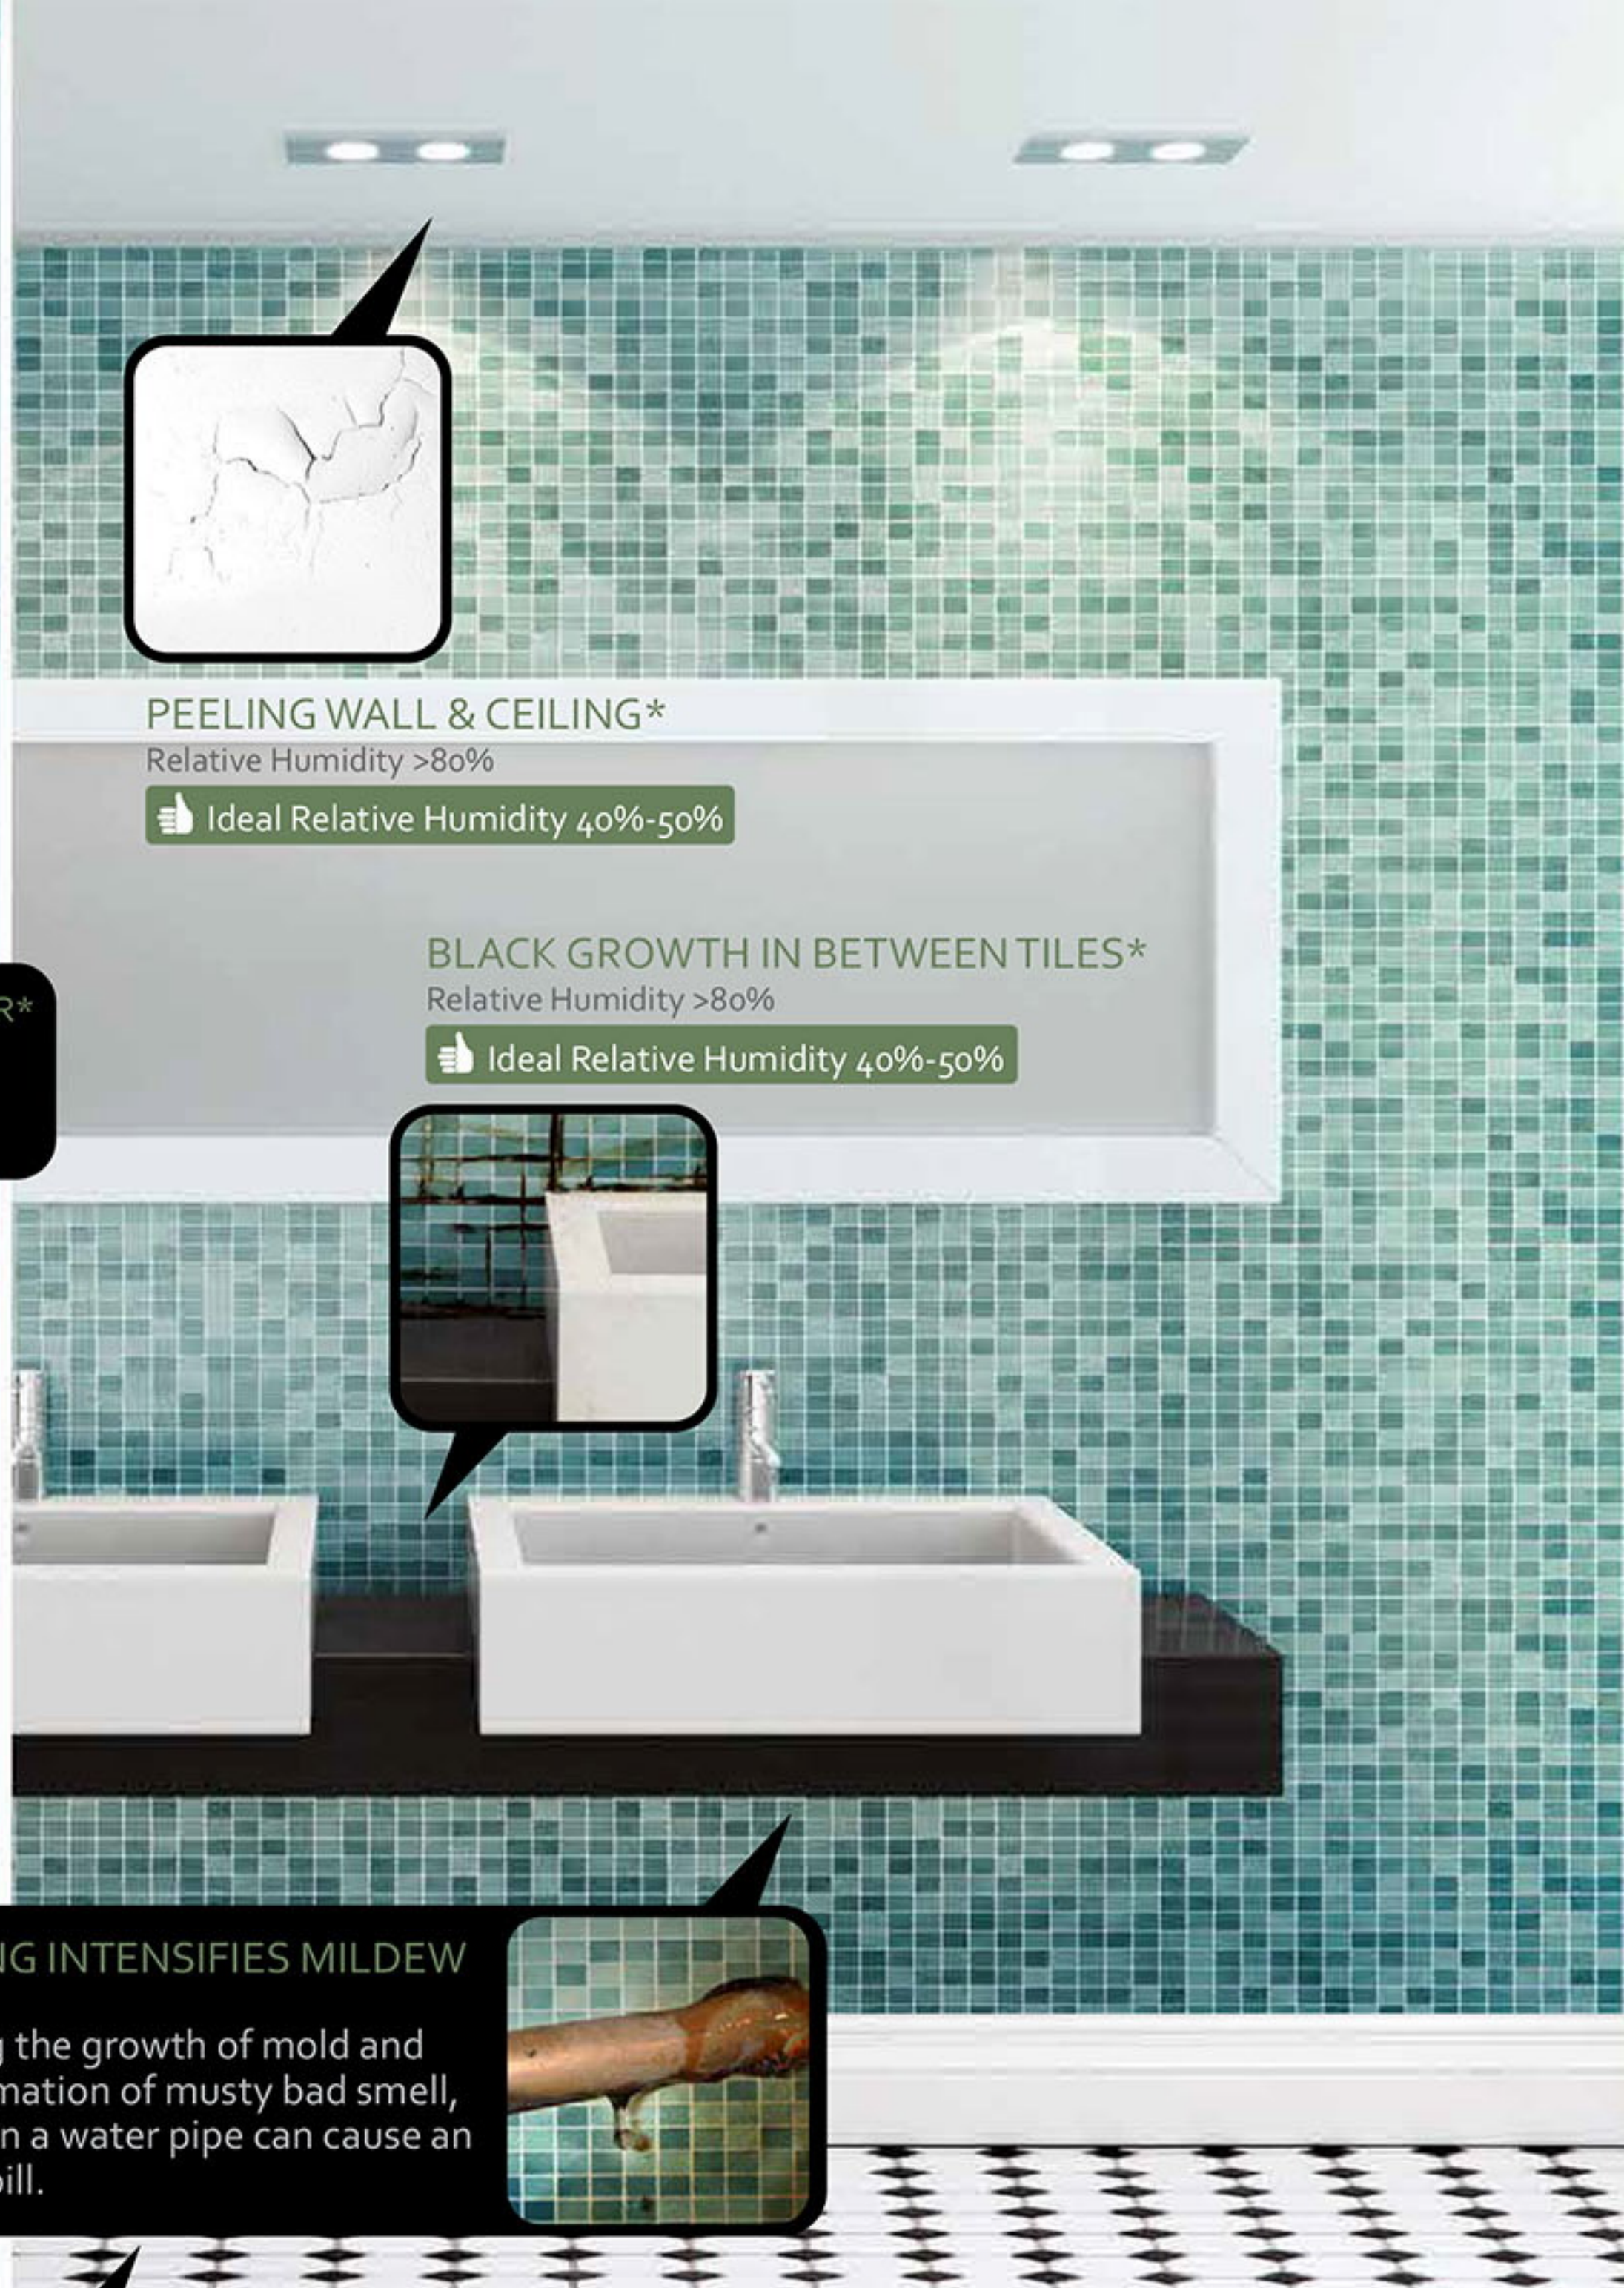

Relative Humidity 70%-90%

👍 Ideal Relative Humidity 45%-60%

**WARDROBE MOLD & MUSTY ODOUR\***  
Wardrobe that retains moisture can potentially cause damage to clothing, shoes and other items stored in it.

**PEELING WALL & CEILING\***

Relative Humidity >80%

👍 Ideal Relative Humidity 40%-50%

**BLACK GROWTH IN BETWEEN TILES\***

Relative Humidity >80%

👍 Ideal Relative Humidity 40%-50%

**LEAKY PLUMBING INTENSIFIES MILDEW PROBLEMS**  
From encouraging the growth of mold and mildew to the formation of musty bad smell, even a small leak in a water pipe can cause an enormous repair bill.

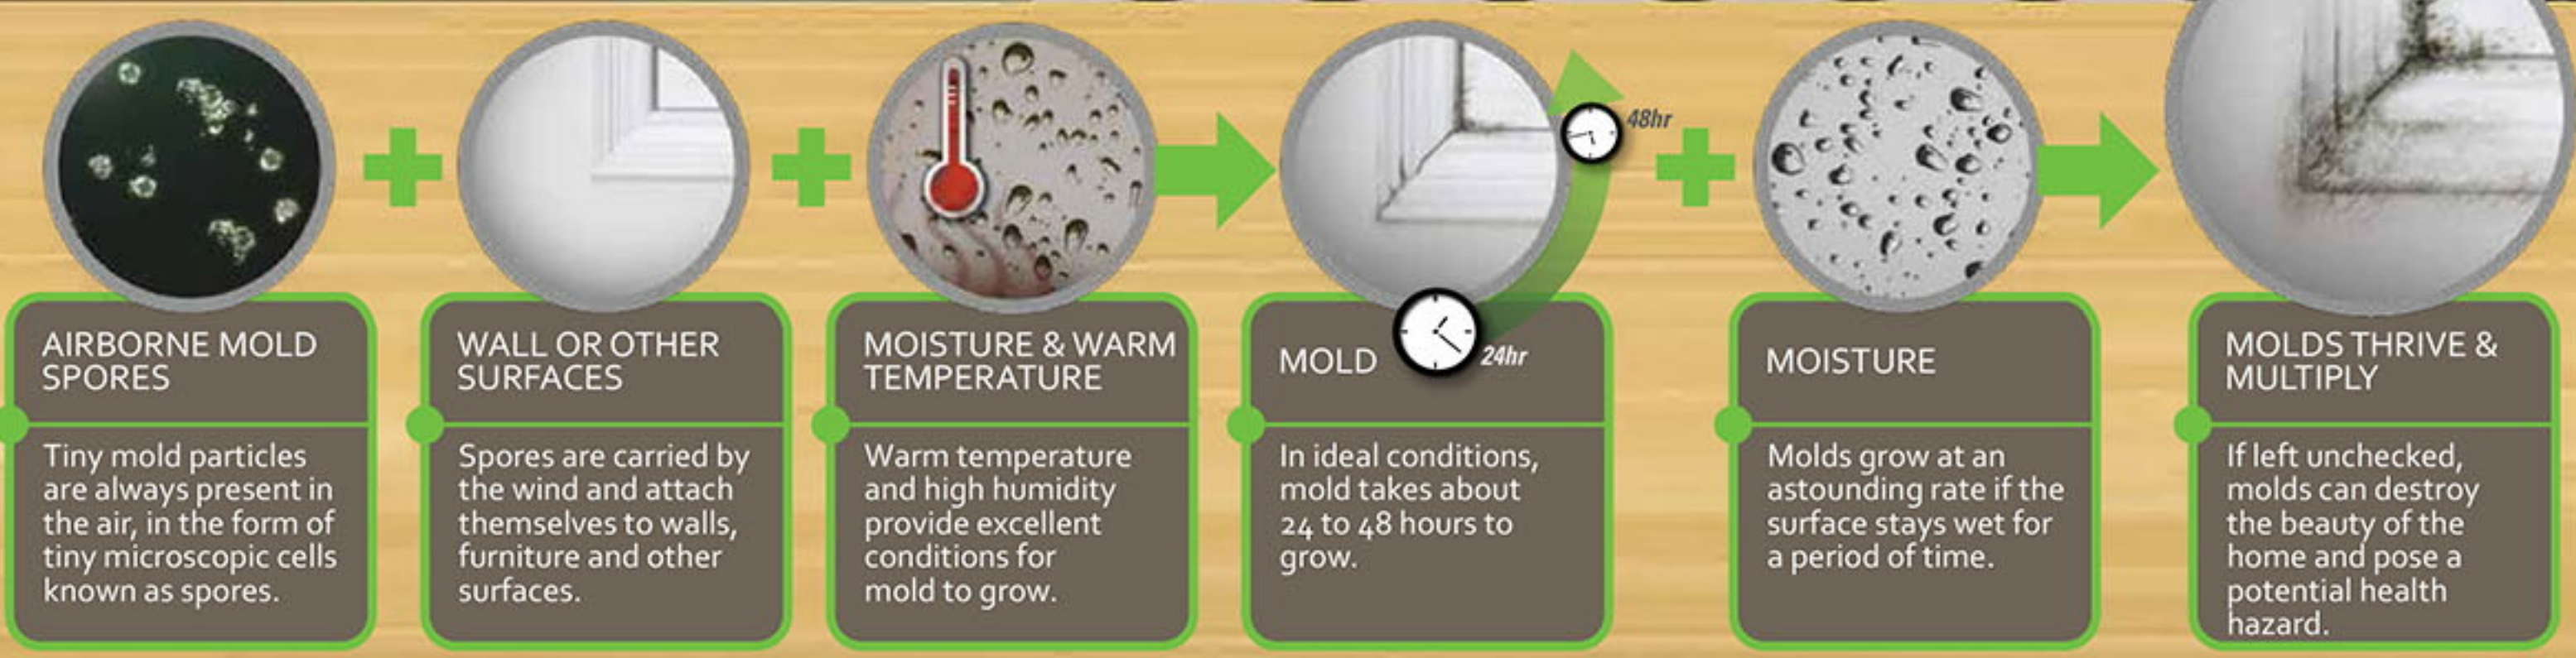

**Oops!** Signs your home may need a dehumidifier:  
 • Musty odor • Cracking or flaking paint • Peeling wallpaper • Stains or discoloration on walls and ceilings  
 • Warped wood • Sticky or damp feeling in the air • Black growth in between tiles • Moisture dripping from pipes

**Beware!** High moisture level promotes the growth of destructive organisms like mold, fungus, mildew and causes severe damage to valuables such as musical instruments, camera equipments, upholstery and wooden furnishings.  
To prolong the lifespan of your precious belongings, the relative humidity (RH) or amount of moisture in the air should be kept between 40% - 50%. This can be difficult to achieve as the RH level varies from 70% to 95% throughout the year.

**DO YOU KNOW HOW MOLDS FORM?**

# KEEP DRY & STOP MOLD

## How NOVITA Dehumidifiers Combat Moisture

### STEP 1

Draws in excess moisture from the air and cools it

### STEP 2

Moisture laden air is condensed into water droplets

### STEP 3

Water collected in water tank or drained away through continuous drainage option

### STEP 4

Achieve the desired humidity and cleaner air at the same time

**LOWEST**  
power consumption  
at only 180 watts

### COMPACT & PORTABLE

Dehumidifier ND 290-i

- 12 l/day extraction (30° C/90% RH)
- Coverage area 1500-2000 cu.ft
- 180 watts power consumption
- Dimension (WxDxH) 12x8x20 inches
- Weight 11kg
- Tank capacity 3.5 l
- Air flow 150 m<sup>3</sup>/hr
- Noise Level (approx.) 35db

### PRECISE & EFFICIENT

Dehumidifier ND 316 | ND 320

- 16 l | 20 l/day extraction (30° C/80% RH)
- Coverage area 2000-2500 | 2500-3000 cu.ft
- 320 watts | 360 watts power consumption
- Dimension (WxDxH) 13x9x22 inches
- Weight 13kg | 13.3 kg
- Tank capacity 3 l
- Air flow 150 m<sup>3</sup>/hr | 200 m<sup>3</sup>/hr
- Noise Level (approx.) 38db

### SOPHISTICATED & DETAILED

Dehumidifier ND 322

- 22 l/day extraction (30° C/90% RH)
- Coverage area 2500-3000 cu.ft
- 360 watts power consumption
- Dimension (WxDxH) 13x14x23 inches
- Weight 13kg
- Tank capacity 4.5 l
- Air flow 165 m<sup>3</sup>/hr
- Noise Level (approx.) 35db

## REGULATE HUMIDITY JUST THE WAY YOU WANT IT

Novita Dehumidifiers take charge where excessive moisture and high humidity prevail, for your desired relative humidity level at all times. They work to bring you 4 rewarding benefits - regulate humidity, control excessive moisture, prevent mold & mildew growth and defence against allergies. Your best move to keep humidity in check begins with novita Dehumidifiers today, everyday.

## HANDY & RELIABLE

Dehumidifier ND 330

- 30 ℓ/day extraction (30° C/90% RH)
- Coverage area 3500-4000 cu.ft
- 470 watts power consumption
- Dimension (WxDxH) 11x15x23 inches
- Weight 13.5kg
- Tank capacity 3.7 ℓ
- Air flow 165 m<sup>3</sup>/hr
- Noise Level (approx.) 38db

Regulate Humidity

Control Excessive Moisture

Prevent Mold & Mildew Growth

Defence Against Allergies

## STRONG & STURDY

Dehumidifier ND 390-i

- 35 ℓ/day extraction (30° C/80% RH)
- Coverage area 3500-4000 cu.ft
- 550 watts power consumption
- Dimension (WxDxH) 15x11x24 inches
- Weight 14.2kg
- Tank capacity 6.5 ℓ
- Air flow 220 m<sup>3</sup>/hr
- Noise Level (approx.) 49db

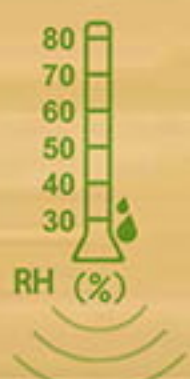

SINGAPORE'S  
HIGHEST  
capacity domestic  
dehumidifier  
at 50 ℓ/day

## POWERFUL & EFFECTUAL

Dehumidifier ND 690

- 50 ℓ/day extraction (30° C/80% RH)
- Coverage area 5000-5500 cu.ft
- 740 watts power consumption
- Dimension (WxDxH) 15x11x23 inches
- Weight 20kg
- Tank capacity 8 ℓ
- Air flow 310 m<sup>3</sup>/hr
- Noise Level (approx.) 42db

### Feature Highlights of NOVITA Dehumidifiers

#### AUTO HUMIDITY SENSOR

Built-in hygostat diagnose the surrounding relative humidity and automatically activate or deactivate the dehumidifier when the humidity surpasses or drops below the desired humidity setting, saving you the need for constant checking.

#### AUTO STOP WITH FULL TANK INDICATION

Unit stops automatically with instant notification when the water tank is full. Operation will resume after the water tank is emptied.

#### ROTARY COMPRESSOR

Using the rotary compressor, NOVITA Dehumidifiers are quieter and more efficient as compared to the conventional reciprocating compressor based models.
