Innovative Protection

SLIDING SECURITY SCREEN DOORS

At Spensa Screens, our sliding security mesh doors are engineered to deliver maximum protection with minimal visual impact — an ideal balance for today's modern homes. Crafted with high-tensile Aluminium mesh and precision-built aluminium frames, these doors create a robust barrier that keeps your living spaces secure while allowing fresh air and natural light to flow freely.

The mesh width is 50 mm/80mm, with a maximum stretchable angle of 168degrees/180degrees. Spensa security doors use steel wheels on the top and bottom rails for smoother movement. These rails are dust-resistant and have longer durability. The security mechanism uses a weather strip and magnetic strip to completely seal the door. The security door enhances the home décor.

ALUMINIUM SLIDING FOLDING METAL SOLID SECURITY DOORS

At Spensa Screens, we specialize in delivering modern, robust, and secure screening solutions. Our Pleated Security Metal Solid Mesh Systems not only provide complete protection from mosquitoes but also add an extra layer of security, privacy, and safety to your spaces. They act as privacy partitions, safeguard balconies from water and birds, block unwanted dust, and enhance safety for children and pets. Ideal for homes, offices, pantries, hospitals, security shutters for shops, godowns, kiosks, and office meeting rooms — Spensa Screens offer versatile protection without compromising ventilation or style. Engineered with solid, durable materials, these systems ensure maximum strength and total coverage. With precision fabrication and professional installation, we guarantee a seamless fit and long-lasting performance.

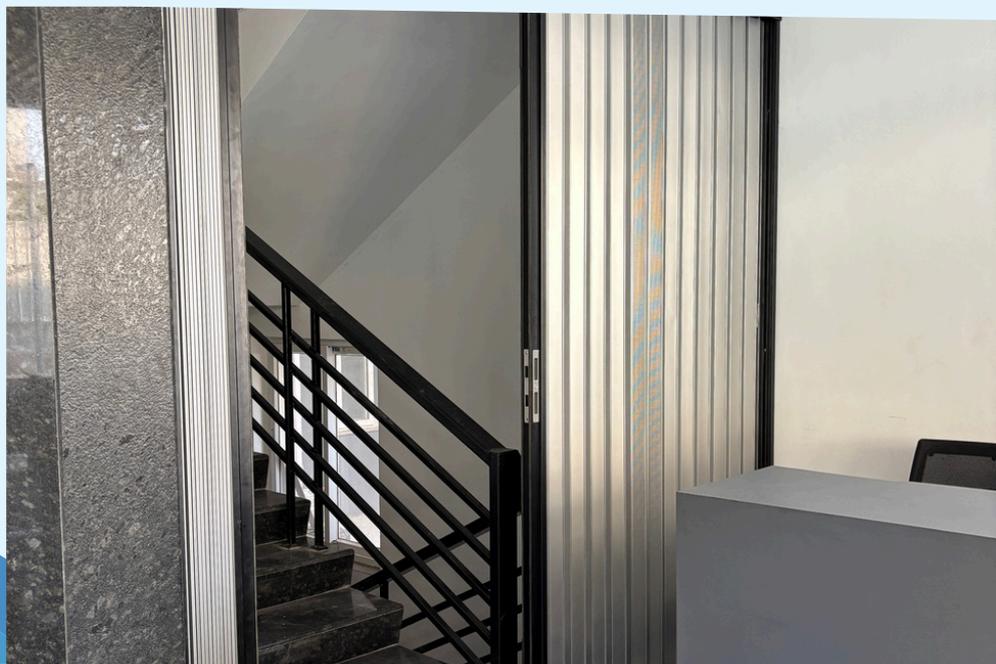

The mesh comes in 50mm and 80mm widths, with a maximum stretch angle of 168° to 180°. Spensa security doors feature durable steel wheels on both the top and bottom rails, ensuring smooth, effortless operation. The rails are designed to resist dust build-up, extending their lifespan. A combination of weather strips and magnetic strips creates a complete seal for added security. Beyond protection, these security doors also elevate your home décor.

SLIDING SECURITY SCREEN DOORS - Clear PVC

At Spensa Screens, our See-Through PVC Panel Folding Doors are designed to blend practical functionality with modern aesthetics — delivering privacy, flexibility, and reliable performance for today's living and working spaces. Crafted with high-quality PVC panels and robust aluminium or steel frames, these folding doors create a lightweight yet effective barrier that stops unwanted dust, prevents rain from entering, and is perfect for use during the monsoon season. Enjoy sitting in your balcony and watching the rain while staying dry, with 100% natural light and fresh air when you want it. These doors can also act as an air-conditioning airflow breaker, helping maintain indoor temperatures. Simply open or close them as needed for maximum convenience. Ideal for homes, offices, meeting rooms, or partitions, Spensa Folding Doors offer a stylish, versatile solution for modern spaces..

Perfect for balconies, verandas, patio areas, utility rooms, indoor partitions, or even commercial spaces where flexible division and easy access are essential

Expert Service & Installation

ZIPSCREEN®

Zip Screen is an Australian-designed and manufactured and features the latest in technological innovation, ensuring the finest outdoor shadesolution.

Zip Screen's head boxes are manufactured from high-quality aluminium featuring a modern, square profile. The versatile installation options offer either a full or semi-enclosed cassette or fascia configuration. The fabric is concealed by the channels, and z-LOCK securely fastens the fabric in position, creating a strong, streamlined finish. With precision integration, the zip-guided system ensures zero gaps between the fabric and channel while ensuring effortless operation.

PLEATED SCREEN DOORS & WINDOWS

Our high-quality Pleated mesh systems act as a visible barrier — visually deterring insects, pests, and even potential intruders — while maintaining airflow and style. Spensa pleated screens offer a stylish solution to screen doors and windows for all openings. Side, top, and bottom guides and wires with a hidden tension system retain the pleated mesh within the screen rails, while integrated runners at the ends of the bottom rails ensure the screen is smooth and easy to operate. Spensa insect screen profiles, guides, and handle rails are all powder coated to match your existing joinery.

Available Pleated Series : 25 Series, 30 Series, 32 Series, 34 Series & 40 Series
where pleated mesh doors can be used: Balcony Doors, Main Entrance door, Windows

Mostly Used Materials:

Polyester Mesh, Fiberglass Mesh, PP (Polypropylene) Mesh, Stainless Steel Wire Mesh.

Why Choose Pleated Screens?

Our pleated screens offer a sleek solution to keep insects out while letting fresh air in. Designed for today's modern homes, they combine functionality, style, and durability perfect for doors, windows, balconies, or large openings.

- Smooth Operation — Easy to open & close with minimal effort.
- Space-Saving Design — Folds neatly away when not in use.
- Maximum Ventilation — Enjoy natural airflow without compromise.
- Low Maintenance — Easy to clean & long-lasting.

Available Fabric Colours: Grey, Grey & Blue

FEATURES

PRINTED PLEATED SCREEN DOORS

Our premium coloured pleated mesh systems create an effective visible barrier — blocking insects, pests, and even discouraging unwanted intruders — all while ensuring excellent airflow and adding a touch of style to your home. Spensa's pleated screens provide an elegant screening solution for doors and windows of all sizes. Engineered with side, top, and bottom guides plus a concealed tensioning system, the mesh stays perfectly in place within the rails. Smooth integrated runners at the ends of the bottom rails make operation effortless and reliable. All Spensa insect screen profiles, guides, and handle rails are powder-coated in matching colours to seamlessly blend with your existing frames and décor.

Maintains Core Functionality

Available Colours : Pink, Blue, Green Bamboos, Floral prints, Leaf or vine motifs and more.....

Why Choose Printed Screens?

Printed Pleated Mosquito Screens offer more than just protection from insects — they combine practicality with style. Here's why they're a smart choice for modern homes and offices:

1. Stylish Aesthetics
2. Added Privacy
3. UV & Glare Control
4. Durable & Long-Lasting
5. Customizable to Suit You
6. Blend with Interior Colours
7. A perfect fit for the children's room
8. Easy Operation & Maintenance

A Subtle Yet Strong Visual Barrier for Pests and Privacy

PLEATED HONEYCOMB DOORS & WINDOWS

Honeycomb blinds and partitions are fabrics with aluminium profiles that can be used as partitions, window coverings, and door covering solutions. All fabrics are made from non woven or spun-bonded polyester and will not fray or fade. All fabrics are easy to care for, highly durable, sponge washable, and dust resistant. Spensa energy fabrics have a wide range of insulation and light values, keeping you warm in winter and cool in summer. Pleated honeycomb blinds can be used in home theatre setups, office partitions, living spaces, and office cubicles.

Available Fabric Colours: Ivory, Grey & Blue

Adjust natural light beautifully.

Easy usage and maintenance free

KEY FEATURES

1. Versatile Application: Perfect for windows, main doors, balconies, large openings, and even as stylish partitions for big rooms and spacious portions.
2. Energy Efficient: Acts as an effective air-conditioning cut-off, helping maintain indoor temperatures and reduce energy costs.
3. Elegant Design: Adds a touch of modern style and enhances the beauty of your home, giving living spaces a luxury look.
4. Flexible Use: Easy to open and close whenever needed, providing protection and privacy without blocking natural light.
5. Privacy & Comfort: Works as a semi-opaque barrier — keeps insects out, reduces dust entry, and adds an extra layer of privacy.

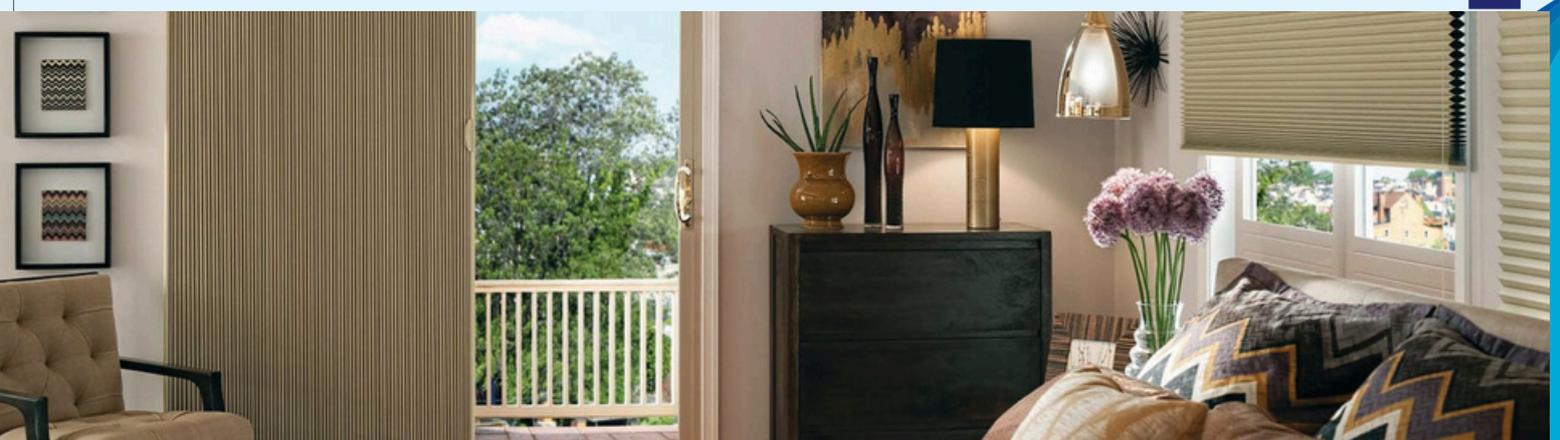

Reduce outside noise

Perfect Premium Space

Effortless to open & close

Easy clean and easy care

FEATURES

Clean with Ease,
Care with Confidence

PRINTED HONEYCOMB FABRICS

Printed Honeycomb Screens are a perfect blend of style and smart functionality for modern windows and doors. Featuring elegant printed patterns, these innovative screens not only block insects but also add a decorative touch to any room. The unique honeycomb (cellular) design traps air, offering excellent thermal insulation that keeps interiors cooler in summer and warmer in winter, helping reduce energy costs. These screens gently diffuse sunlight, protect against harmful UV rays, and provide added privacy without sacrificing natural light. Easy to operate, smooth to retract, and simple to maintain, Printed Honeycomb Screens are an ideal choice for homeowners who want practical protection with a touch of personalized style.

FEATURES

Low Maintenance	Stay cool in summer, warm in winter
Flexibility of Sizes	Block harmful UV rays
Fade-resistant prints	Easy to open, close, and adjust

KEY FEATURES

Add a touch of art and comfort to your windows and doors with our premium Printed Honeycomb (Cellular) Screens — the smart choice for modern homes and workspaces.

Why Choose Printed Honeycomb Screens?

1. Designer Look
2. Privacy with Personality
3. Insulation & Energy Savings
4. Soft Light Control & UV Protection
5. Smooth, Space-Saving Design
6. Effortless Maintenance
7. Creates refreshing and mood boosting vibes in room
8. Increases value of property with luxurious look.

Invest Once, Enjoy Long-Term Savings

FLY SCREEN DOORS

Spensa Fly Screen Doors do not hinder the view instead provide ventilation and protection from insects and are a unique addition to any home. Spensa fly screens can be manufactured for all types of doors and windows and our high quality nylon components ensure years of trouble-free operation.

Door frames have bottom kick plate with center mid bars. The screens are suitable for all types of doors & windows including hinged, center pivot, balconies, utility, kitchens, French doors, etc. All of the frame profiles are powder coated/anodized which are easy to clean, smooth & rust free.

Mesh Available: SS 304/Black, Natural, Aluminium Mesh & Fiber Glass.

4. Seamless Integration
5. Effective Seal & Protection
6. Versatile Applications
7. Low Maintenance

INVISIBLE GRILLS

invisible grille is the installation of stainless-steel cables to cover windows, balconies, or open areas of high rise buildings. They are an advance gilling system that keeps homes safe and beautiful. It is made of high-quality stainless-steel cable (316L grade) and nylon coated with a nanotechnology membrane for complete wear and tear resistance. The cable distance can be 2", 3" & 4" (inches) and installation can be vertical or horizontal.

FEATURES

Safe and Secure

Unblocked View

Zero Maintenance

High tensile strength

Easy clean & Easy care

Value For Money

SLIDING SCREEN DOORS & WINDOWS

Our sliding insect screen doors are engineered to offer an elegant, high-performance solution for modern aluminium sliding door joinery. Designed with a slim, low-profile external track system, they integrate seamlessly without adding bulk — ensuring a clean, sophisticated finish that complements contemporary architecture.

Precision-built using reinforced aluminium corners and discreet, height-adjustable bottom rollers, these screens guarantee smooth, effortless operation and long-term structural stability. The integrated slim-line vision rail enhances safety by providing a clear visual marker, preventing accidental impact — especially for children and elderly family members.

Each frame is powder-coated with premium-grade finishes, colour-matched to harmonise with your existing joinery for a unified, bespoke appearance. Our sliding insect screen systems can be retrofitted to existing uPVC, aluminium, or steel doors and windows using specially engineered adaptor profiles — ensuring maximum insect protection without compromising your view or ventilation.
