About Us

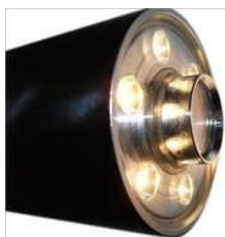

Ahpat Technology offers high-accuracy imaging solutions for applications where regular cameras are ineffective. Being a manufacturer, supplier, and exporter, the firm engages in the production of advanced waterproof and borewell camera systems appropriate for tough environments. The solutions are meant to capture high-quality images deep underwater, inside narrow shafts, and across rugged field locations, thus being crucial to laborers working in agriculture, water management, Boilers, marine, and infrastructure industries.

From the camera with cable to the dam reservoir inspection camera, Mines Rescue camera and underwater fish camera, every product promises clarity, toughness, and dependable performance. New features like low-latency real-time video transmission, corrosion-resistant hardware, cable compatibility versatility, and low-light optimized imagery change inspections in harsh conditions. Whether it's the compact waterproof camera for small spaces or the heavy-duty waterproof camera wire designed for long-term deployment, each unit is crafted with care and tested for dependability. Our products are built not only to work but to last. Manual wire winches provide secure handling in remote locations, and advanced waterproof sealing allows for uninterrupted use, even when fully submerged.

Key Facts

Nature of Business	Manufacturer
Primary Competitive Advantages	DAM INSPECTION CAMERA,USB BOREWELL CAMERA,UNDERWATER BOREWELL PIPELINE INSPECTOIN CAMERA,TUBEWELL WATERPROOF CAMERA,BOREWELL SCANNING WATERPROOF CAMERA,waterproof camera
No of Staff	10
Year of Establishment	2008
No of Production Lines	2
OEM Service Provided	Yes
Monthly Production Capacity	As per client requirement
ProductRange	DAM INSPECTION CAMERA,USB BOREWELL CAMERA,UNDERWATER BOREWELL PIPELINE INSPECTOIN CAMERA,TUBEWELL WATERPROOF CAMERA,BOREWELL SCANNING WATERPROOF CAMERA,waterproof camera
