Gluco Chek Test Strip

The 8 electrodes on the Gluco Chek™ 5 Seconds test strip are working with the Gluco Chek™ meter 5 Seconds to deliver highly accurate result. Detailed functions of those electrodes are:

- Code calibration (auto-coding)
- Eliminating the hematocrit interference
- Eliminating the temperature interference
- Checking humidity exposure
- Checking whether the sample is sufficient
- Checking the sample as blood or a control solution
- Checking the possible damage of the test strip

Specifications

10 to 600mg/dL
Plasma-equivalent
Fresh capillary whole blood
About 0.5µL
About 5 seconds
Two AAA LR03 1.5V Batteries
12 months or approximately 1,000 tests
Up to 1,000 records with date and time
2 minutes after last action
93.5mm x 60.5 mm x 20 mm
47mm x 37 mm
Approximately 67.4g (with battery installed)
5-45°C
10-90% (non-condensing)
