

## STEAMPACK

Oil And Gas Fired  
Three Pass Package Boiler

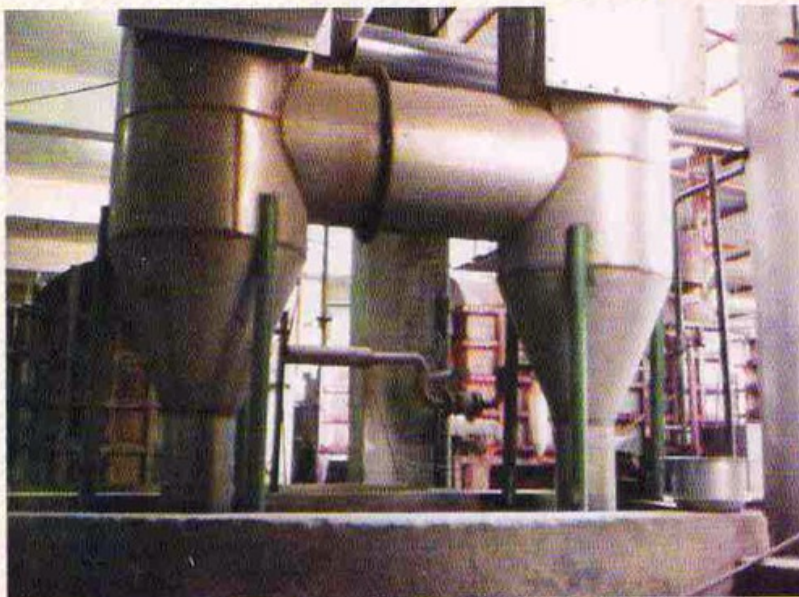

### HIGH PRESSURE BOILER

We Are Manufacturing Package Shell Type Three Pass Package Boilers Gas & Oil Fired In High Pressure, High Temperature With Super-Heated And Saturated Steam Quality, Environment Friendly With Thermic Fluid Heater In Different Fuel and capacity In High Efficiency.

### PULSATING GRATE

It Is A Equipment Of An Industrial Boiler Which Brings The Fuel To The Furnace Like Flower Waste Bagasse, Biomass Briquettes, Saron Estra Burning Properly Without Any Crenelisation And Problem.

### AIR POLLUTION CONTROL DEVICE WET SCRUBBER

As per reduced of pollution norms and control of fine particals or powder form particals control we design special bag filters and wet scrubber specially for control emissions and sulpher dioxide with CO<sub>2</sub> generated from burning fuel like coke, pet coke, imported coke and other fuels in furnaces and boilers with thermic fluid heater and to control prescribed limit fixed by pollution control board as well as department of environment (Govt. of India)
