INDUSTRIAL VALVE BOXES

MANHOLE DRAINAGE COVER

CAST IRON MANHOLE COVER

About Us

Products like Manhole Covers and Frames, Manhole Grate, Top Riser, etc., are essential but often overlooked parts of modern-day urban infrastructure. These products are used when constructing sewer systems, stormwater drains, and utility tunnels, and as such need to be of high quality. We, Rinita Metaliks Private Limited, make a range of top-class products using durable materials like cast iron, ductile iron, or composite materials. All these materials are sourced from credible vendors so that we can use the same to build even customized products for heavy-duty applications at hugely discounted prices.

Our aim is to engineer products like frames and covers of unmatchable quality. We resort to the best machining processes at our workshop to achieve the desired dimension and give a smooth surface finish to each product. We then offer the range to various entities, including government agencies, construction companies, and utility service providers based all across India.
