

CIGARETTE VENDING MACHINE

Features:

- ▶ Cigarette Vending Machines are used for storing Cigarette Packets inside the Vending machine in safe and hygienic condition for dispensing against payment. Finds application in smoking rooms/zones in Corporate Offices, Clubs and resto-bars.
- ▶ The self-service Cigarette Vending Machine receives the payment by UPI – QR Code only and dispenses a packet of cigarettes to the user.
- ▶ The machine has a capacity to stock 10 different brands of cigarette packets with a capacity to hold 10 packets for each brand. Total dispensing capacity of 100 packets from this compact wall mountable / desktop Cigarette vending machine.
- ▶ The LCD displays the QR Code. The user scans the QR code and makes the cashless payment using any UPI application. Once payment credit is received, the LCD displays the credit amount received on the display. The user selects the choice of brand by entering selection number 01 to 10 on the keypad. The cigarette packet is dispensed and picked up from the collection outlet in the front of the machine.
- ▶ Cigarettes are dispensed only to adults and not to children under 18 years of age. The QR code payment mode configured in the machine ensures that only adults with Bank Accounts are enabled to purchase Cigarettes from the machine. The machine does not advertise any tobacco product.
- ▶ This cigarette packet vending machine legally complies with the provisions of the Cigarette and Other Tobacco Products Act 2003 (COTPA 2003) and is not in contravention to the specific provisions of Sections 5,6,7 and 24 of the COTPA 2003.
