About Penguin Engineering

The Penguin Innovative Engineering Company has been in existence since 1992 and is known for its innovative manufacturing, which has brought about a lot of automation in the food manufacturing industry. The young owner of the company, Mr. Aakash Gajjar, joined and produced 101 fresh inventions as a student during his engineering days. A success story was made of his innovations, which he carried forward to his company with advanced engineering products. The company serves people with utility, ease, and effectiveness. Manufacturing units of this company ensure the food industry's basic hygiene needs. Its innovative products, excellent quality, and 24x7 customer support have set it apart from other companies. Starting out with just one employee and one product, today, Penguin Engineering has more than 100 expert employees and a plethora of products. One constant is its innovation."
