# SLIDING WINDOWS

Slider doors and windows consist of two or more sashes that open horizontally. These windows are placed along a track and fitted to rollers that enable smooth and swift movement. Further, as the sashes stay within the frame instead of opening outwards or inwards, sliding windows offer optimum space utilisation. Install them with aluminium or uPvc frames and enjoy a great panoramic view of the outdoors.

# CASEMENT WINDOWS

Casement windows are ideal for spaces with excellent exterior views. They are equipped with a unique double-sealing mechanism that makes them airtight and keeps out noise, dust, and pollution. Casement windows are available in an array of choices (like top-hung, side-hung, etc.) to complement your home decor. Casement windows are held by hinges and open inwards or outwards, depending on the functionality required. Apart from this, we provide sturdy and aesthetically appealing aluminium and uPVC window frames for enhanced security and curb appeal.
