COMPONENT SPECIFICATIONS

Component Type	Precision Machined Brass Pins, Solid Plug Pins & Terminal Connectors
Material & Plating	High-grade brass alloy with nickel or tin plating options for superior corrosion resistance and electrical conductivity
Product Assortment	Various pin diameters, lengths, split pins, solid pins, and custom terminal blades for electrical plugs and sockets
Manufacturing Precision	Strict dimensional tolerances, high insertion durability, and low contact resistance
Applications	Electrical plug top assemblies, adapters, switchgear components, and electronic connectors
