That's why we have several production sites to enable us to always keep the best prices to our buyers by eliminating or minimizing the quota affect to costs

## Working Procedure in Particular:

For fresh production, we prefer to pursue the following steps-

01. Buyer provides us the Technical and all details of the objective product.
02. We do the consumption and costing in our office by our own professional, independent of any factory.
03. We offer the buyer the costing that should be feasible and then, if it is necessary, we negotiate to agree to a price.
04. We negotiate with the factories that would be interested in undertaking the order at the price that have been agreed upon with the buyer.
05. We submit to the buyer company profiles of the factories that agree to take the order.
06. Buyer audits and selects the factories.
07. We submit the Pro-forma Invoice (PI).
08. Buyer issues us Transferable L/C.
09. We transfer the L/C to the factory and then-
10. Production process commences.

## Expertise & Export Market:

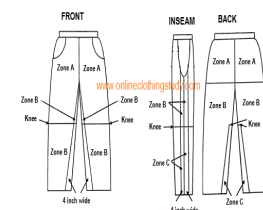

**AZTECH** manages its own supply chain with specially nominated yarn, fabric & accessory suppliers across Bangladesh for any product, trim and accessories can be sourced, with its fully vertical factories providing knit, sweater & woven. AZTECH has the flexibility to handle orders of any volume, style and color within short lead times. Because, we don't believe in "minimum quantity" theory. We accept any quantity we believe today's minimum will take only one consignment time to return into Maximum.

## Sample Program:

We need the spec, sketch, design and all details including the yarn composition and then we make sample for clients' approval. Sometimes, we do this sampling according to a given sample (original sample) from the client-end and then send them for the clients' approval. After receiving the approval, we make some more samples in case of buyers' satisfaction. If the sample quantity is a large number, then we make it as per buyers' requirements with a mutual understanding.

## Quality Control:

No way to compromise set/required quality level-this is what we believe in terms of quality.
