About Us

With a vision to provide reliable steel options, empowering the future of modern infrastructure, Electrotherm (India) Ltd is dedicated to excellence. As a manufacturer and supplier, we use technology and a vast amount of expertise to create steel products that are consistent, durable and perform. The product line comprises of steel TMT bar, high grade steel bar, coated TMT bar and high-quality ET CRS TMT bars, which address the rigorous demands of residential, commercial and industrial construction projects. From every production step, this continuous innovation, precision engineering and strict quality control guarantee reliable structural support, outstanding load-bearing capacity and durability in service. The company has been engineering steel solutions with excellence for decades and has consistently been a leader in advanced manufacturing processes to deliver resistance against corrosion, cracks, deformation and harsh environments. Reliable technology investment and continuous improvement ensure that products can be produced with uniform finish quality, high weldability and excellent workability, suitable for various fabrication and construction applications. A team of competent and experienced people adopts a customer-centric strategy, getting to know the needs of the industry and providing solutions that guarantee customer certainty on all projects. Each project is supported by a vision of building stronger structures through innovation, reliability and strict quality standards, and promoting sustainable industrial development. Integrity, performance, and customer satisfaction are still at the core of every operation, and Electrotherm (India) Ltd continues to be a trusted partner to ensure quality steel solutions in various building environments.

Founded in 1983 in Ahmedabad, Gujarat, India, Electrotherm (India) Ltd has become a trusted brand in the steel industry, known for its innovation and reliability in providing top-tier steel solutions for contemporary building requirements. The company is a manufacturer and supplier and offers a diverse product line of steel TMT bar, high-grade steel bar, coated TMT bar and high quality ET CRS TMT bar. With a staff of 7000 people, it is supported by a dedicated personnel and works with high-technology manufacturing, engineering and practices which enable them to produce products which meet the needs of any residential, commercial or industrial project. Precision manufacturing, consistent quality, and dependable performance are highlighted in all aspects of our operations, creating an environment of innovation and continuous improvement. All products are designed to deliver high strength, long-lasting durability, high corrosion resistance and structural stability to meet strict industry standards. The company's dedication to excellence, innovation, and customer satisfaction ensures its continued role as a trusted provider of quality steel solutions, supporting the construction of safe, efficient, and sustainable infrastructure in various industries.

Key Facts

Nature of Business	Manufacturer
No of Staff	7000
Year of Establishment	1983
No of Production Lines	1
OEM Service Provided	Yes
Monthly Production Capacity	As per requirment
