

BAKUCHIOL_{99%}

(EXTRACT OF PSORALEA CORYFOLIA SEEDS)

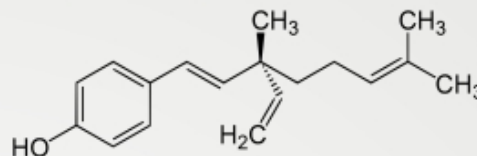

MAHAVEER HERBAL'S
MANUFACTURERS & EXPORTERS

Product Details :-

- Molecular Formula : C₁₈H₂₄O
- Molecular Weight : 256.38 Grams (g)
- Product Type : BAKUCHIOL 99%
- CAS No : 10309-37-2
- Storage : Room Temperature
- Physical Form : Liquid
- Shelf Life : 24 Months
- HS Code : 13021919
- Ingredients : BAKUCHIOL 99% EXTRACT By Psoralea corylifolia Seed
- Purity : 99% By HPLC
- Payment Terms : Telegraphic Transfer (T/T), Others, Cash Advance (CA), Cash in Advance (CID), Western Union
- Sample Available : Yes
- Main Domestic Market : All world
- Packaging Details : 1, 5, 10 or 20 Kg. Aluminium Bottle
- Main Export Market (s) : Middle East, North America, Central America, Australia, South America, Asia, Western Europe, Eastern Europe
- Sample Policy : Free samples available with shipping and taxes paid by the buyer
- Offered By : MAHAVEER HERBALS

BAKUCHIOL

(Extract of Psoralea Coryfolia Seeds)
Purity = 99% By HPLC.

Product Description :-

We are the topmost exporter, manufacturer, distributor and supplier of Bakuchiol 99% in Sumerpur, Rajasthan, India. Bakuchiol is a meroterpenoid (a chemical compound having a partial terpenoid structure) in the class terpenophenol. It is found in *Psoralea corylifolia* and in *Otholobium pubescens*. It has been reported to have anticancer activity in pre-clinical models, possibly due to its structural similarity with resveratrol. One study in rats suggested that bakuchiol and ethanol extracts of the *Psoralea corylifolia* Seed could protect against bone loss. Bakuchiol isolated from *Psoralea corylifolia* has shown activity against numerous Gram-positive and Gram-negative oral pathogens. It was able to inhibit the growth of *Streptococcus mutans* under a range of sucrose concentrations, pH values and in the presence of organic acids in a temperature-dependent manner and also inhibited the growth of cells adhered to a glass surface. Bakuchiol was also found to have retinol functionality.

Bakuchiol has been found to possess antiandrogen activity

Specifications

- Product Name : Bakuchiol
- Source Name : *Psoralea corylifolia*
- IUPAC Name : 7-dimethyl-(1,6-octadienyl)-4-(3-ethenyl-(S-(E))-phenol
- CAS No : 10309-37-2
- Molecular Formula : C₁₈H₂₄O.
- Molecular Weight : 256.38
- Purity by HPLC : >99%
- Available Quantity : 100g, 500g, 1, 5, 10 & 20 kg.
